

## EQUALITY SCREENING TEMPLATE

See [Guidance Notes](#) (POL:PP:032) for further information on the 'why' 'what' 'when', and 'who' in relation to screening, for background information on the relevant legislation and for help in answering the questions on this template .

### (1) INFORMATION ABOUT THE POLICY OR DECISION

#### 1.1 Title of policy (incl. doc. reference number) or decision :

Menopause at Work Policy

#### 1.2 Description of policy or decision

- **what is it trying to achieve? (aims and objectives)**
- **how will this be achieved? (key elements)**
- **what are the key constraints? (for example financial, legislative or other)**

The menopause policy is intended to provide clarity, direction and support on how menopause related issues should be dealt with, for individuals experiencing difficulties associated with the menopause. It is also important to acknowledge that indirectly the menopause can affect women's partners, families and colleagues.

The aims and objectives of this policy are to:

- Provide a clear definition of what the menopause is, the stages of menopause, when it occurs and what happens.
- Understand how menopause related issues can affect staff, their families and work colleagues.
- Raise wider awareness and understanding among staff of menopause and outline support and adjustments that are available.
- Foster an environment in which staff can openly and comfortably instigate conversations, or engage in discussions about menopause.
- Set clear responsibilities for different groups within the organisation.
- Ensure a consistent approach in the management of staff that are struggling whilst at work with menopausal symptoms.
- Help reduce menopause related sickness absence and promote the retention of menopausal staff in an attempt to retain a skilled and experienced workforce within the organisation.
- Identify ways to support staff where performance at work is impacted through an assessment and action plan.

Possible constraints: There may be some working environments such as being out on blood donation sessions where it is more difficult to offer adjustments to women. However, NIBTS has a legal obligation to consider 5 reasonable adjustments for staff who are considered to have a disability brought on by the symptoms of the menopause.

### **1.3 Main stakeholders affected (internal and external)**

**For example staff, actual or potential service users, other public sector organisations, voluntary and community groups, trade unions or professional organisations or private sector organisations or others**

All Northern Ireland Blood Transfusion Employees (including Agency, Bank Staff & Volunteers) in particular women.

Trade Unions - UNISON, Royal College Nursing, NIPSA and the BMA have produced guidance for their members on menopause and work.

### **1.4 Other policies or decisions with a bearing on this policy or decision**

- **what are they?**
- **who owns them?**

Policies & Procedures:

- NIBTS Absence Management Policy

Legislation that have a bearing on this policy is as follows:

- Sex Discrimination (NI) Order 1976
- Disability Discrimination Act (DDA) 1995
- Employment Equality (Age) regulations (NI)2006

## (2) CONSIDERATION OF EQUALITY AND GOOD RELATIONS ISSUES AND EVIDENCE USED

### 2.1 Data gathering

**What information did you use to inform this equality screening? For example previous consultations, statistics, research, Equality Impact Assessments (EQIAs), complaints. Provide details of how you involved stakeholders, views of colleagues, service users, staff side or other stakeholders.**

NIBTS employee data (HRPTS)

NI HSC Workforce Census March 2020 (health-ni.gov.uk)

Amanda Griffiths, Sara Jane MacLennan and Juliet Hassard, 'Menopause and work: An electronic survey of employees' attitudes in the UK', *Maturitas*, no.2 (2013), pp155-159

Clare Hardy, Eleanor Thorne, Amanda Griffiths and Myra Hunter, 'Work outcomes in midlife women: the impact of menopause, work stress and working environment'. *Women's Midlife Health*, 4, no.1, (2018), pp.3.

### 2.2 Quantitative Data –

**Who is affected by the policy or decision? Please provide a statistical profile. Note if policy affects both staff and service users, please provide profile for both.**

<b>Category</b>	<b><i>What is the makeup of the affected group? ( %) Are there any issues or problems? For example, a lower uptake that needs to be addressed or greater involvement of a particular group?</i></b>
Gender	<p><b>NIBTS Staff Data (April 2021):</b> 69% female, 31% male</p> <p>DOH reported 79% (54,043) of HSCNI employees were female. The gender split of NIBTS employees is currently 69% female.</p> <p><b>Census Data:</b> Northern Ireland population (2011 Census): Female 51%, Male: 49%.</p> <p>Mid-year population estimate (2018; published June 2019): The size of the resident population in Northern Ireland at 30 June 2018 is estimated to be 1.88 million people. Just over half (50.8 per cent) of the population were female, with 955,400 females compared to 926,200 males (49.2 per cent). <a href="https://www.nisra.gov.uk/sites/nisra.gov.uk/files/publications/MYE18-Bulletin.pdf">https://www.nisra.gov.uk/sites/nisra.gov.uk/files/publications/MYE18-Bulletin.pdf</a></p>

	<ul style="list-style-type: none"> <li>• The Gender Identity Research and Education Society (GIREs) estimate the number of gender nonconforming employees and service users, based on the information that GIREs assembled for the Home Office (2011) and subsequently updated (2014):             <ul style="list-style-type: none"> <li>• gender variant to some degree 1% o</li> <li>• have sought some medical care 0.025%</li> <li>• having already undergone transition 0.015%</li> </ul> </li> </ul> <p>The number who have sought treatment seems likely to continue growing at 20% per annum or even faster. Few younger people present for treatment despite the fact that most gender variant adults report experiencing the condition from a very early age. Yet, presentation for treatment among young people is growing even more rapidly (50% p.a.). Organisations should assume that there may be nearly equal numbers of people transitioning from male to female (trans women) and from female to male (trans men).</p> <p>Applying GIREs figures to NI population (using NISRA mid-year population estimates for June 2018) N=1,881,600:</p> <ul style="list-style-type: none"> <li>• 18,816 people who do not identify with gender assigned to them at birth</li> <li>• 470 likely to have sought medical care</li> <li>• 282 likely to have undergone transition.</li> </ul>														
Age	<p><b>NIBTS Staff Data (April 2021):</b></p> <table border="1"> <thead> <tr> <th>Age Group</th> <th>%</th> </tr> </thead> <tbody> <tr> <td>16-24</td> <td>6%</td> </tr> <tr> <td>25-34</td> <td>18%</td> </tr> <tr> <td>35-44</td> <td>23%</td> </tr> <tr> <td>45-54</td> <td>23%</td> </tr> <tr> <td>55-64</td> <td>26%</td> </tr> <tr> <td>&gt;=65</td> <td>4%</td> </tr> </tbody> </table> <p>Menopause occurs between 45-55 years for most women, and in the UK the average is 51 years. In HSC, 22% of the total workforce is female aged 45-54 years (just over 1 in 5 people) with a further 10% in the 40-44 years. In NIBTS, female workforce is 69%</p> <p>Population profile: Mid-year population estimates published by NISRA in 2019 show that: 0-19 yrs (inclusive) = 485,064 (25.7% of all NI population) 20 – 34 yrs = 364,623 (19.3%) 35 – 49 yrs = 366,967 (19.5%) 50 - 64 yrs = 356,790 (19.0%) 65 – 74 yrs = 169,725 (9.0%) 75 – 89 yrs = 125,334 (6.6%) 90+ yrs = 13,138 (0.7%)</p> <p><a href="https://www.nisra.gov.uk/statistics/population/mid-year-population-estimates">https://www.nisra.gov.uk/statistics/population/mid-year-population-estimates</a></p> <p>Age projections NISRA Estimated and projected population by age, mid-2016 to mid-2041 show that in 2016, 20.8% of the NI Population were aged 0-15</p>	Age Group	%	16-24	6%	25-34	18%	35-44	23%	45-54	23%	55-64	26%	>=65	4%
Age Group	%														
16-24	6%														
25-34	18%														
35-44	23%														
45-54	23%														
55-64	26%														
>=65	4%														

	<p>years, and this is projected to decrease 18.2% in 2041. The proportion of adults aged 16-64 in 2016 was 63.2% of the whole population, set to decrease to 57.2 by 2041. However, the proportion of people aged 65 years and over is projected to rise from 16.0% in 2016 to 24.5% in 2041, overtaking the numbers of children.</p> <p><a href="https://www.nisra.gov.uk/publications/2016-based-population-projections-northern-ireland-statistical-bulletin-charts">https://www.nisra.gov.uk/publications/2016-based-population-projections-northern-ireland-statistical-bulletin-charts</a></p>
Religion	<p><b>NIBTS Staff Data (April 2021):</b> 37% Catholic 47% Protestant 7% Neither 9% Not determined</p> <p><b>Census Data:</b> 45.1% of the population from a Catholic background. 48.4% of the population from Protestant and other Christian background. 0.9% of population from other religions. 5.6% of population no religion or religion not stated (2011 Census).</p>
Political Opinion	<p><b>NIBTS Staff Data (April 2021):</b> 10% Broadly Nationalist 8% Broadly Unionist 16% Other 66% No answer</p> <p><b>Census Data:</b> Of those eligible to vote in the NI Assembly election of 2011, 43.21% voted for a Unionist candidate as a first preference, 41.18% voted for a Nationalist/Republican candidate as a first preference and approximately 15% voted for other candidates as a first preference</p>
Marital Status	<p><b>NIBTS Staff Data (April 2021):</b> 13% Unknown 29% Single 56% Married / Civil Partnership 1% Divorced 0.5% Widowed 0.5% Separated</p> <p><b>Census Data:</b> 2011 Census figures report 48% of the resident population aged 16 and over are married, whilst 36% are single, 0.1% are registered in same-sex civil partnerships, 9.4% are divorced, separated or formerly in same-sex partnership and 6.8% are either widowed or a surviving partner.</p> <p><b>Northern Ireland Life and Times (2018)</b> Single (never married) 32% Married and living with husband/wife 51% A civil partner in a legally-registered civil partnership 0% Married and separated from husband/wife 3%</p>

	<p>Divorced 6% Widowed 7%</p> <p><b>Civil partnerships</b> Annual Reports of the Registrar General for NI show that Between 2005 to 2018 inclusive, there have been 1298 civil partnerships registered in NI. Available at: <a href="https://www.nisra.gov.uk/Registrar-General-Annual-Report">Registrar General Annual Report   Northern Ireland Statistics and Research Agency (nisra.gov.uk)</a></p>
Dependent Status	<p><b>NIBTS Staff Data (April 2021):</b> 28% Staff with dependents 27% Staff without dependants 45% Not assigned</p> <p><b>Census Data:</b> Census 2011 figures report 12% of the resident population provide unpaid care to family members, friends, neighbours, and 34% of households contain dependent children and 34% of households contain dependent children.</p> <p><b>CarersNI State of Caring 2019 Annual survey (UK wide, including NI)</b></p> <ol style="list-style-type: none"> <li>1) 2 in 5 carers (39%) responding reported being in paid work.</li> <li>2) 38% of all carers reported that they had given up work to care.</li> <li>3) 18% had reduced their working hours.</li> <li>4) 1 in 6 carers (17%) said that they work the same hours but their job is negatively affected by caring, for example because of tiredness, lateness, and stress.</li> <li>5) 12% of carers said they have had to take a less qualified job or have turned down a promotion to fit around their caring responsibilities.</li> <li>6) Just over 1 in 10 carers (11%) said they had retired early to care.</li> <li>7) Only 4% of respondents of all ages said that caring has had no impact on their capacity to work.</li> <li>8) Only one quarter (25%) of carers who aren't yet retired and had an assessment in the last year felt that their need to combine paid work and caring was sufficiently considered in their carer's assessment.</li> <li>9) Carers who are not yet retired were also asked about their future plans and 53% said they are not able to save for their retirement.</li> <li>10) Some carers are saving or have saved less for their retirement with 17% saying they did this because their working hours were reduced.</li> </ol>
Disability	<p><b>NIBTS Staff Data (April 2021):</b> 51% No Disability 5% With Disability 44% Not Assigned</p> <p>It is estimated that 80% of women in the UK report noticeable changes, whilst 25% of women experience very debilitating symptoms. Around 30%- 60% of women experience physical and/or psychological symptoms during the menopause.</p>

	<p><b>Census Data:</b> Census 2011 figures report 21% of the population regard themselves as having a disability or long-term health problem which has an impact on their day to day activities.</p> <p><b>Health Survey NI (2017/18 – published 2019)</b></p> <ul style="list-style-type: none"> <li>• 43% longstanding illness (32% limiting and 11% non-limiting illness)</li> <li>• Females (44%) were more likely than males (40%) to have a long-term condition.</li> <li>• Prevalence also increased with age with 22% of those aged 16-24 reporting a long-term condition compared with 70% of those aged 75 and over.</li> <li>• Four-fifths of respondents (81%) had contact with the Health and Social Care System in Northern Ireland</li> <li>• Of these, 84% were either very satisfied or satisfied with their experience</li> <li>• A fifth (21%) reported high levels of anxiety, while 45% reported very low levels</li> </ul> <p>Health Inequalities Annual Report 2019 can be found here: <a href="https://www.health-ni.gov.uk/news/health-inequalities-annual-report-2019">https://www.health-ni.gov.uk/news/health-inequalities-annual-report-2019</a></p>
Ethnicity	<p><b>NIBTS Staff Data (April 2021):</b> 67% White Less than 1% Pakistani Less than 1% Other 32% Not Assigned</p> <p><b>Census Data:</b> Census 2011 figures report 1.8% of the resident population belong to a minority ethnic group, with 3.1% stating their first language is not English.</p>
Sexual Orientation	<p><b>NIBTS Staff Data (April 2021):</b> 50% Someone of the opposite sex 4% Someone of the same sex 3% Do not wish to answer 43% Not assigned</p> <p><b>Population profile: In 2016, estimates from the Annual Population Survey (APS) showed that:</b></p> <ul style="list-style-type: none"> <li>• 93.4% of the UK population identified as heterosexual or straight and 2.0% of the population identified themselves as lesbian, gay or bisexual (LGB). This comprised of: <ul style="list-style-type: none"> <li>○ 1.2% identifying as gay or lesbian</li> <li>○ 0.8% identifying as bisexual</li> </ul> </li> <li>• A further 0.5% of the population identified themselves as “Other”, which means that they did not consider themselves to fit into the heterosexual or straight, bisexual, gay or lesbian categories. A further 4.1% refused, or did not know how to identify themselves.</li> </ul>

- The population aged 16 to 24 were the age group most likely to identify as LGB in 2016 (4.1%).
- More males (2.3%) than females (1.6%) identified themselves as LGB in 2016.
- The population who identified as LGB in 2016 were most likely to be single, never married or civil partnered, at 70.7%.

There are no accurate statistics on sexual orientation in the community as a whole, it is however estimated that between 5% and 10% of the population would identify as lesbian, gay or bisexual.

## 2.3 Qualitative

**What are the different needs, experiences and priorities of each of the categories in relation to this policy or decision and what equality issues emerge from this? Note if policy affects both staff and service users, please discuss issues for both.**

<b>Category</b>	<b>Needs and Experiences</b>
Gender	<p>The menopause affects all women, and it can often indirectly affect their partners, families and colleagues as well. For example, stress or relationship difficulties caused by the symptoms or wellbeing of their partner. This can, in turn affect workplace performance. Whilst women/she/her is used in the policy, it is for all employees regardless of their perceived gender.</p> <p>The menopause can often come at a time of life when women are already experiencing other issues or difficulties, such as the onset of age related health conditions, increasing caring responsibilities for elderly or sick parents and relatives as well as children or grandchildren. Women still tend to have a larger share of caring responsibilities and these can be an added source of stress during the time of the menopause. Increases in the state pension age also mean that some women will now have to work longer than they may have planned.</p> <p>Men can be indirectly affected by the menopause for example if their partner is experiencing insomnia and night sweats, men may also experience disrupted sleep and fatigue. If a man's partner experiences significant physical or psychological symptoms (such as depression) he may be concerned for her wellbeing and feel increased levels of stress. In some cases, people can experience relationship problems or difficulties at home at this time. These issues can have an impact on men in the workplace.</p> <p>Different genders can also be affected, for example transgender, non-binary and intersex people can also experience the menopause. Transgender people may not want to disclose their trans status which cause stress and in turn affect workplace performance and wellbeing. Transgender men (those who identify as male but were assigned female at birth) will experience a natural menopause if their ovaries remain in place and no hormone therapy is given.</p> <p>Transgender men will also experience menopausal symptoms if the ovaries and uterus are surgically removed (this may happen at an earlier age than commonly happens with a natural menopause). Symptoms may be reduced or complicated if hormone therapy (such as the male hormone testosterone) is in place.</p> <p>Transgender women (those who identify as female but were assigned male at birth) undertaking hormone therapy will usually remain on this for life and should generally experience limited 'pseudo' menopausal (menopausal-like) symptoms - unless hormone therapy is interrupted, or hormone levels are unstable. Such treatment interruptions however can be a common experience for transgender women (and transgender men). The Policy and Guidance will increase support for those experiencing menopause related issues at work and promotes understanding to those who are indirectly affected.</p>

Age	<p>Evidence shows with an ageing population increasing numbers of women are working whilst experiencing the menopause. In the UK it is estimated that around 1 in 3 women are either currently going through or have reached the menopause. However, it is important to remember some women may experience an early menopause or premature ovarian insufficiency (around 1 in every 100 women will have the menopause before the age of 40) or they may experience a surgical or medical menopause. As well as the symptoms of the menopause, these women may have a range of related difficulties to deal with at the same time– for example, fertility problems and side effects from fertility treatments or recovery from cancer treatment (or both). Many fertility treatments can also in themselves cause side effects similar to the menopause such as fatigue, night sweats, anxiety and depression. Women who have an early or premature menopause are also more at risk of developing osteoporosis ('brittle bones') and heart disease.</p> <p>It is important to recognise that variance exists in age of onset of symptoms and the severity and longevity of symptoms experienced. In many cases it is an individual experience, not comparable with colleagues of the same age or stage of menopause.</p>
Religion	There is no data to suggest that the needs and experiences of service users differ on the basis of Religion.
Political Opinion	There is no data to suggest that the needs and experiences of service users differ on the basis of Political Opinion.
Marital Status	Partners/spouses of menopausal women may be indirectly affected. For example, if their partner/spouse is experiencing insomnia and night sweats, they may also experience disrupted sleep and fatigue. If a partner experiences significant physical or psychological symptom (such as depression) they too may be concerned for her wellbeing and feel increased levels of stress. In some cases, people can experience relationship problems or difficulties at home at this time, in turn may affect their workplace performance.
Dependent Status	There is no data to suggest that the needs and experiences of service users differ on the basis of Dependant Status.
Disability	<p>Evidence suggests that the menopause can affect and exasperate existing conditions. Physical and psychological symptoms can adversely affect the quality of both personal and working life. There may be occasions in which severe and prolonged menopausal symptoms have a significant impact on daily functioning and have lasted or are likely to last for 12 months or more that the disability legislation could potentially apply and reasonable adjustments should be considered in the workplace.</p> <p>Additionally, those with disability may perceive menopausal symptoms differently and may find it more difficult to access medical help for symptoms or to get the right support. The aim of this policy is to provide support and guidance.</p>

<p><b>Ethnicity</b></p>	<p>Reporting of the most common and significant symptoms of menopause has also been found to vary among different ethnic groups. It is unclear to what extent these differences are caused by social, economic, language and cultural factors rather than a woman’s ethnic origin. People who do not have English as a first language or with diverse cultural backgrounds may have more difficulty in communicating symptoms or difficulties they are experiencing, as many cultures do not have a term to recognise the menopause. This may make it more difficult for them to access medical advice or ask for help or adjustments at work. The aim of this policy is to provide support and guidance.</p>
<p><b>Sexual Orientation</b></p>	<p>Women in same sex relationships may have a partner who is going through the menopause at the same time. While this can be positive in terms of increased mutual understanding and support at home, sometimes, if both partners are experiencing symptoms such as sleep disturbance or night sweats, this may increase tiredness and fatigue for both partners. It may also be more difficult if both partners experience symptoms such as depression or mood swings at the same time.</p>

**2.4 Multiple Identities**

**Are there any potential impacts of the policy or decision on people with multiple identities? For example; disabled minority ethnic people; disabled women; young Protestant men; and young lesbians, gay and bisexual people.**

<p>N/A</p>
------------

## 2.5 Making Changes -

**Based on the equality issues you identified in 2.2 and 2.3, what changes did you make or do you intend to make in relation to the policy or decision in order to promote equality of opportunity?**

<b><i>In developing the policy or decision what did you do or change to address the equality issues you identified?</i></b>	<b><i>What do you intend to do in future to address the equality issues you identified?</i></b>
<p><b>Gender</b> Whilst menopause occurs in women, it was important to highlight how it can affect different genders both directly and indirectly. This policy and supporting guidance are intended to provide clarity and direction on how NIBTS should deal with menopause related issues, for all individuals irrespective of their perceived gender who are experiencing difficulties associated with the menopause.</p> <p><b>Age</b> Although menopause is part of the natural ageing process, medical conditions or surgical intervention can bring on menopause irrespective of age. This policy and supporting guidance highlights how variance exists in age and will raise wider awareness and understanding of menopause. In many cases it is an individual experience, not comparable with colleagues of the same age or stage of menopause.</p> <p><b>Disability</b> Menopause of itself is not a disability, however, depending on the severity and longevity of menopause related symptoms experienced by the individual it may be classified as such. Davies - v - Scottish Courts &amp; Tribunal Service in May 2018, an employee's menopausal symptoms were deemed to be a disability for the purposes of the Disability Discrimination Act 1995. Therefore, when dealing with employees who have menopausal symptoms, NIBTS will be mindful of the need to consider if an employee is disabled as a result of those</p>	<p>This policy shall be reviewed:</p> <ul style="list-style-type: none"> <li>• Every 2 years or;</li> <li>• following receipt of new information;</li> <li>• upon implementation of new agreements which may affect the procedure</li> <li>• Regular communication to staff on awareness/education on menopause</li> <li>• Consultation with appropriate groups from the voluntary sector via Employment Equality Network Group</li> <li>• Ensure appropriate language is used and update where necessary</li> <li>• Provide awareness sessions on Menopause on a regular basis</li> </ul>

<p>symptoms and if it is concluded that they are - reasonable adjustment(s) will be considered in line with relevant policies and related legislative provisions such as the DDA 1995. Case law has also recognised the importance of putting in place 'timely' reasonable adjustments for staff with a disability.</p> <p><b>Marital Status/Ethnicity/Sexual Orientation</b></p> <p>Menopause Assessment and Action Plan: Guidance for managers and employees included in appendices to support the policy outlining how the menopause can have an effect on marital status, and how the menopause can affect people differently depending on their ethnicity and sexual orientation. This policy covers the impact of the menopause on employees working within HSC organisations recognising that severe menopausal symptoms can adversely affect health and wellbeing, work performance, absenteeism, presenteeism, staff retention and/or health and safety at work.</p> <p>The policy sets out the key principles to which NIBTS should adhere to, to ensure that individuals affected by the menopause or perimenopause are treated fairly and given the appropriate support and any reasonable adjustments if applicable.</p>	
---	--

**2.6 Good Relations - What changes to the policy or decision – if any – or what additional measures would you suggest to ensure that it promotes good relations? (refer to guidance notes for guidance on impact)**

<b>Group</b>	<b>Impact</b>	<b>Suggestions</b>
Religion	N/A	
Political Opinion	N/A	
Ethnicity	N/A	

**(3) SHOULD THE POLICY OR DECISION BE SUBJECT TO A FULL EQUALITY IMPACT ASSESSMENT?**

A full equality impact assessment (EQIA) is usually confined to those policies or decisions considered to have major implications for equality of opportunity.

**How would you categorise the impacts of this decision or policy?  
(refer to guidance notes for guidance on impact)**

**Please tick:**

Major impact	<input type="checkbox"/>
Minor impact	<input checked="" type="checkbox"/>
No further impact	<input type="checkbox"/>

**Do you consider that this policy or decision needs to be subjected to a full equality impact assessment?**

**Please tick:**

Yes	<input type="checkbox"/>
No	<input checked="" type="checkbox"/>

Please give reasons for your decisions.

It is not felt that a full EQIA will highlight any further issues with regards to equality of opportunity for the Section 75 groups.

**(4) CONSIDERATION OF DISABILITY DUTIES**

**4.1 In what ways does the policy or decision encourage disabled people to participate in public life and what else could you do to do so?**

<b><i>How does the policy or decision currently encourage disabled people to participate in public life?</i></b>	<b><i>What else could you do to encourage disabled people to participate in public life?</i></b>
N/A	

**4.2 In what ways does the policy or decision promote positive attitudes towards disabled people and what else could you do to do so?**

<b><i>How does the policy or decision currently promote positive attitudes towards disabled people?</i></b>	<b><i>What else could you do to promote positive attitudes towards disabled people?</i></b>
<p>The policy will increase support for all employees experiencing the effects of the menopause. Where severe menopausal symptoms have a substantial adverse impact on an employee’s daily functioning for 12 months or more - reasonable adjustments will be considered and provided for in line with the DDA 1995.</p>	

**(5) CONSIDERATION OF HUMAN RIGHTS****5.1 Does the policy or decision affect anyone's Human Rights?****Complete for each of the articles**

<b>ARTICLE</b>	<b>Yes/No</b>
Article 2 – Right to life	No
Article 3 – Right to freedom from torture, inhuman or degrading treatment or punishment	No
Article 4 – Right to freedom from slavery, servitude & forced or compulsory labour	No
Article 5 – Right to liberty & security of person	No
Article 6 – Right to a fair & public trial within a reasonable time	No
Article 7 – Right to freedom from retrospective criminal law & no punishment without law	No
Article 8 – Right to respect for private & family life, home and correspondence.	No
Article 9 – Right to freedom of thought, conscience & religion	No
Article 10 – Right to freedom of expression	No
Article 11 – Right to freedom of assembly & association	No
Article 12 – Right to marry & found a family	No
Article 14 – Prohibition of discrimination in the enjoyment of the convention rights	No
1 <sup>st</sup> protocol Article 1 – Right to a peaceful enjoyment of possessions & protection of property	No
1 <sup>st</sup> protocol Article 2 – Right of access to education	No

*If you have answered no to all of the above please move on to **Question 6** on monitoring*

**5.2 If you have answered yes to any of the Articles in 5.1, does the policy or decision interfere with any of these rights? If so, what is the interference and who does it impact upon?**

List the Article Number	Interfered with? Yes/No	What is the interference and who does it impact upon?	Does this raise legal issues?*
			Yes/No
N/A			

*\* It is important to speak to your line manager on this and if necessary seek legal opinion to clarify this*

**5.3 Outline any actions which could be taken to promote or raise awareness of human rights or to ensure compliance with the legislation in relation to the policy or decision.**

N/A

**(6) MONITORING –**

**6.1 What data will you collect in the future in order to monitor the effect of the policy or decision on any of the categories (for equality of opportunity and good relations, disability duties and human rights)?**

Equality & Good Relations	Disability Duties	Human Rights
Monitored through feedback from Occupational Health, Managers and Staff.	Monitored through feedback from Occupational Health, Managers and Staff.	Monitored through feedback from Occupational Health, Managers and Staff.

Approved Lead Officer: Rumy Collins

Position: HR & Training Manager

Date: 20<sup>th</sup> August 2021

Policy/Decision Screened by: Rumy Collins

**Please note that having completed the screening you are required by statute to publish the completed screening template, as per NIBTS equality scheme. If a consultee, including the Equality Commission, raises a concern about a screening decision based on supporting evidence, you will need to review the screening decision.**

***Please forward a copy of the completed screening template and policy/strategy to the HR Office for publishing.***

If you require this document in an alternative format (such as large print, Braille, disk, audio file, audio cassette, Easy Read or in minority languages to meet the needs of those not fluent in English) please contact a member of the HR department.
