

Part III

List of Appliances

Notes

1. Definition - The appliances that may be supplied against orders on Form HS21 are listed below and must conform to the specifications shown. These specifications include published official standards i.e. BP, BPC or relevant British Standard or the Drug Tariff Technical Specification. It should be emphasised that any appliance must conform to the entry in this part of the Tariff as well as with the official standard or technical specification quoted therein.
2. Sealed Packets - These are those which are "tamper-evident" - sealed with an easily detachable device that prevents removal of the contents without the seal being broken. Additionally in the case of sterile products: once a sealed package has been opened it should not be possible to re-seal it easily. Where an appliance, other than a bandage, required by the Tariff to be supplied in a sealed packet is ordered of a quantity or weight not listed in the Tariff, the quantity ordered should be made up as nearly as possible with the smallest numbers of sealed packets available for the purpose. Where the quantity ordered is less than the smallest quantity/weight, supply the smaller pack. The quantity of material in each packet supplied should be recorded on the prescription form.
3. Weights - All weights specified in the Tariff in respect of appliances are exclusive of wrappings and packing material.
4. Invoice price - This is the price chargeable for the appliance to the contractor by the manufacturer, wholesaler or supplier.
5. Technical specifications. Numbered Drug Tariff technical specifications are listed in Part XII.
6. The list of preparations that may be prescribed by nurses on Form HS 21(N) is shown in Part IX (b).

Hosiery Made To Individual Measurements

- Surgical Stockings made to the patient's individual measurements are available in all 3 compression classes and should be specified or supplied whenever irregular limb dimensions are present and cannot be fitted with stock sizes.
- All garments are specially shaped during manufacture and must have a knitted-in or open heel and open toe.
- Seams and finishes must be designed to form no restrictions and must be flat and soft against the limb.

Manufacturing Guidelines For Made To Measure Garments

- Class I and Class II hosiery can be made using the following methods:
 - Manufactured from open mesh elastic net fabric, cut to shape and seamed.
 - Shaped or fashioned to individual requirements containing knitted, or knitted and inlaid, elastomeric threads.
- Class III hosiery can be made as follows:
Shaped or fashioned to individual requirements with knitted, or knitted and inlaid, elastomeric threads.

NB Elastodiene and elastane threads must be covered for knitting yarns. In the case of hosiery made with inlaid elastomeric threads they may remain uncovered.
