## Public Interest Test (PIT)

Exemption claimed in respect of Section 31 of the Freedom of Information Act 2000 ('Law Enforcement') for disclosure of details on contracts registers

In considering this PIT, the following have been taken into account:

- the public interest in issues of accountability and transparency and in scrutinising how BSO's affairs are conducted
- the public interest in ensuring that BSO is able to protect its systems from cyber-attacks which could damage security
- the public interest in ensuring that BSO can proactively manage the risks around cyber security, for the wellbeing and safety of all its stakeholders

In favour of disclosure of information	In favour of not disclosing information
<p>Openness and transparency: it is recognised that releasing this information would provide the public with assurance that we are:</p> <ul style="list-style-type: none"> <li>• protecting our technologies;</li> <li>• spending public money responsibly, especially where this relates to the provision of public services</li> </ul>	<p>BSO hosts a vast range of software, systems and data on behalf of the wider Health and Social Care (HSC) within Northern Ireland.</p> <p>By not disclosing software supplier / brand the BSO is ensuring that it can proactively manage the risks around cyber security, for the wellbeing and safety of all its stakeholders</p> <p>Release of this information would make BSO, and by association the wider HSC more vulnerable to crime (namely a malicious attack on BSO's network). As such release of this information would be seen to prejudice the prevention or detection of crime by making BSO more vulnerable to hacking at a given time.</p>
	<p>Under data protection legislation, BSO has a legal obligation to process personal data in a manner that ensures its appropriate security using appropriate technical or organisational measures. The release of this information is therefore a reasonable threat to the security and integrity of confidential personal data held on our systems.</p>

	<p>BSO and the wider HSC operate the majority of their services with a high dependency on IT. Many services operate almost exclusively via information held within our network infrastructure. Any disruption of BSO's network infrastructure, even for a short period would be likely to severely restrict our ability to carry out statutory functions across the wider HSC network.</p>
--	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

There is therefore an overwhelming public interest in keeping BSO's systems secure which would be served by non-disclosure.

It has therefore been decided that the balance of the public interest lies clearly in favour of withholding the material on this occasion.
