Dear Colleague

As you will be aware, there are on-going ballots for industrial action being carried out by a number of unions. Any potential action could affect a number of disciplines and HSC organisations, should industrial action short of a strike or strike action be called. Primary care services may be affected both directly and indirectly by industrial action.

You will already have developed business continuity plans. Can you please ensure these plans are up to date, considering any impact from potential industrial action including short of strike and strike action scenarios.

Yours sincerely

**Michael Donaldson
Head of Dental Services**
