Background

Glenmark Pharmaceuticals Europe Ltd is recalling a specific batch of Omeprazole Oral Solution as a precautionary measure due to an investigation following a customer complaint indicating precipitation and discoloration of the product in the bottles. A root cause has identified that this is a result of an inadequate assembly of the plunger stem and the cup which could lead to a premature mixing of the two components of the medicinal product

Advice for Healthcare Professionals:

Stop supplying the above batch immediately. Quarantine all remaining stock and return it to your supplier using your supplier's approved process.

Advice for Healthcare Professionals to Provide to Patients:

No further action is required by patients as this is a Pharmacy and Wholesaler level recall. Patients should continue to take medicines from these batches as prescribed by your healthcare professional.

Patients who experience adverse reactions or have any questions about the medication, should seek medical attention. Any suspected adverse reactions should also be reported via the [MHRA Yellow Card scheme](#).
