AFFECTED LOT BATCH NUMBERS

Batch No.	Expiry Date	Pack Size	First Distributed
25C11T3B	29/2/2028	1000 ml	28/4/2025

Background

Baxter Healthcare is recalling one batch of Compound Sodium Lactate (Hartmann's Solution) 1000mL. This is due to a packaging error where some cartons within this batch labelled as Hartmann's Solution may contain Ringer's Solution 1000mL. This means the wrong product may be inside the box (mixed product in carton).

Advice for Healthcare Professionals:

Stop supplying the above batch immediately. Quarantine all stock and return it to your supplier using your supplier's approved process.

Baxter Healthcare Ltd can confirm 55,340 packs of this batch have been released and distributed. No related adverse event reports or product quality complaints have been received related to this defect.

Advice for Healthcare Professionals to Provide to Patients:

No further action is required by patients as this is a Pharmacy and Wholesaler level. Patients who experience adverse reactions or have any questions about the medication should seek medical attention. Any suspected adverse reactions should also be reported via the [MHRA Yellow Card scheme](#).

Additional information:

For all medical information enquiries and information on this product, please email Medinfo_UKI@baxter.com , or telephone 0800 0260514.

For stock control enquiries please email victoria franklin@baxter.com , or telephone +44 07825 374866.

Recipients of this Medicines Notification should bring it to the attention of relevant contacts by copy of this notice. NHS regional teams are asked to forward this to community pharmacists and dispensing general practitioners for information.
