**Appliances and Reagents (Including the Wound Management Products)**

All Appliances and Reagents included in this list must comply with the description, specifications packs and quantities as specified in the relevant entry in Part II of the Drug Tariff

**Appliances** as listed in Part III (including Contraceptive Devices)

**Incontinence Appliances** as listed in Part IXB of England & Wales Drug Tariff

**Stoma Appliances and Associated Products** as listed in Part IXC of England & Wales Drug Tariff

**Chemical Reagents** as listed in Part II of the Drug Tariff

**PART IX (c)****Non-Medical Independent Prescribing (Nurse, Pharmacist, Optometrist, Physiotherapist & Chiropodist/Podiatrist)**

Nurse Independent Prescribers and Pharmacist Independent Prescribers are able to prescribe any medicine for any medical condition within their competence. This includes any controlled drug listed in Schedule 2-5, except diamorphine, cocaine and dipipanone as regards persons addicted to certain controlled drugs otherwise than for the purpose of treating organic disease or injury by such persons (Nurse and Pharmacist Independent Prescribers are able to prescribe other controlled drugs for the treatment of addiction).

Nurse Independent Prescribers may mix a controlled drug with another medicine and may supply and/or administer morphine under a Patient Group Direction for the immediate and necessary treatment of sick or injured persons.

Optometrist Independent Prescribers can prescribe any licensed medicine for ocular conditions affecting the eye and surrounding tissue, but cannot prescribe any controlled drug independently.

Physiotherapist Independent Prescribers can prescribe any licensed medicine for any condition within their competence within the overarching framework of human movement, performance and function. With effect from 15 November 2019, this includes the following controlled drugs, provided the drug is administered by the specified method: Diazepam (oral), Dihydrocodeine (oral), Fentanyl (transdermal), Lorazepam (oral), Morphine (oral or by injection), Oxycodone (oral), and Temazepam (oral).

Podiatrist Independent Prescribers can prescribe any licensed medicine within their competence and relevant to the treatment of disorders affecting the foot, ankle and associated structures. With effect from 15 November 2019, this includes the following controlled drugs, provided the drug is administered by the specified method: Diazepam (oral), Dihydrocodeine (oral), Lorazepam (oral), and Temazepam (oral).

Nurse, Pharmacist Optometrist, Physiotherapist & Chiropodist/Podiatrist Independent Prescribers:

- must work within their own level of professional competence and expertise;
- are recommended to prescribe generically, except where this would not be clinically appropriate or where there is no approved generic name;
- can prescribe licensed medicines independently for uses outside their licensed indications (so-called 'off-licence' or 'off-label'). They must accept clinical/legal responsibility for that prescribing, and should only prescribe off-licence/off-label where it is accepted clinical practice. In general, the General Optical Council discourages optometrists from prescribing 'off-licence' or 'off-label'. Further guidance is provided in the College of Optometrists Clinical Management Guidelines;
- may prescribe any appliances/dressings that are listed in Part II & III of the Drug Tariff. Optometrist, Physiotherapist and Chiropodist/Podiatrist Independent Prescribers can only prescribe appliances/dressings for the treatment of conditions relevant to their respective areas of professional practice;
- Must not prescribe drugs and other substances listed in Part XI (a) of the Drug Tariff at Health Service expense:
- May prescribe drugs listed in Part XI (b) of the Drug Tariff at Health Service expense, but only in the specified circumstances, for the specified patient groups listed in the Drug Tariff and where this is within their scope of professional practice;

- Nurse and Pharmacist Independent Prescribers can prescribe unlicensed medicines for their patients, on the same basis as doctors and supplementary prescribers. Optometrist, Physiotherapist and Chiropodist/Podiatrist Independent Prescribers cannot prescribe unlicensed medicines:
- Nurse Independent Prescribers and Pharmacist Independent Prescribers may mix medicines for the needs of a particular patient and to direct others to mix. Nurse Independent Prescribers and Pharmacist Independent Prescribers may provide written directions for others to do so for the purpose of administering them to meet the needs of a particular patient.
- May prescribe borderline substances, which have been approved by the Advisory Committee on Borderline Substances (ACBS). A list of ACBS approved products and the circumstances under which they can be prescribed, can be found in Part X of the Drug Tariff. Although this is a non-mandatory list, Nurse Independent Prescribers should normally restrict their prescribing of Borderline Substances to items on the ACBS approved list. Optometrist, Physiotherapist and Chiropodist/Podiatrist Independent Prescribers should not need to prescribe any items on the ACBS list.
