

HSC Trusts offer Hepatitis B vaccinations for CPVS vaccinators

The SPPG community pharmacy vaccination checklist details that pharmacists:

“Consider getting vaccinated against Hepatitis B if appropriate”.

The [Green Book Chapter 18](#) advises that Hepatitis B vaccination is recommended for healthcare workers who may have direct contact with patients’ blood, blood-stained body fluids or tissues. This includes any staff who are at risk of injury from blood contaminated sharp instruments. The Health and Safety Executive guidance on blood borne viruses provides further advice.

From 1st April 2026, persons acting in the role of pharmacy vaccinators, undertaking CPVS services, can contact their local HSC Trust Occupational Health team if they require Hepatitis B vaccination. The Hep B programme is focussed on those persons providing the CPVS Covid-19 and/or Flu vaccination service.

This HSC Trust service provides the pre-exposure schedule (3 doses), titres and 5yr booster (if required) as outlined in the current JCVI guidance. Please note: relevant Trusts will work to provide appointments as early as possible, however, scheduling of clinics will be dependent on the operational capacity of the respective Trusts occupational health service, at that time.

To book an appointment, those pharmacy vaccinators requiring Hepatitis B vaccination should contact the relevant Trust:
