6.0% Citric Acid			
<b>Uro-Tainer Twin Suby G</b>	(9746609)	2 x 30ml	5.50
3.23% Citric Acid			

**Catheters, Urinary, Urethral**

1. Catheter sizes are designated by the Charrière (Ch) gauge system - even numbers only. (The equivalent metric sizes for Charrière gauges 6-30 are 2.0mm-10.0mm, rising in 0.66mm). Where size is not stated by the prescriber, size 14 or 16 should be supplied.
2. If a balloon size is not stated by the prescriber when ordering a Foley catheter, a 10ml balloon catheter should be supplied - a 5ml balloon in the case of a paediatric catheter.
3. Where the brand is not stated by the prescriber, the basic price of each listed catheter supplied must not exceed:

	Basic Price
Nélaton (Male)	0.44
Nélaton (Female)	0.40
Nélaton (Paediatric)	0.40
Foley (Male) long term	3.99 ↓
Foley (Female) long term	3.99 ↓
Foley (Paediatric) long term	5.55

Where the specification of the Foley Catheter is not specified by the prescriber and not endorsed as short/medium or long term the dispenser will be paid no more than the lowest basic price listed which is currently £2.27.

- 4.5-units of plastic catheters, for example, represents on average one month's supply for patients practising intermittent catheterisation.
5. The rate of use of single use Nélaton catheters is approximately between 6 and 45 times greater than reusable Nélaton catheters for patients practising intermittent catheterisation.

**All products in this category must be dispensed with a supply of wipes and disposal bags.**

**(A)(i) Nélaton Catheter ('ordinary' cylindrical Catheter)**
