Health And Personal Social Services - Northern Ireland
Drug Tariff

General Notes

Standards of drugs and appliances

1. All drugs, preparations and appliances supplied by chemists must, where a standard or formula is specified in the British Pharmacopoeia, the British Pharmaceutical Codex, the British National Formulary, or the Drug Tariff, conform to the standard of formula so specified, and in any other case must be of a grade or quality not lower than the grade or quality ordinarily used for medical purposes. All appliances supplied by chemists must, where a specification is included in the Drug Tariff, conform to that specification or be of a grade or quality not inferior thereto, and in any case must conform to the ordinarily recognised standards of good quality.

Scheduled Drug (see also Part XI)

2. The Health and Personal Social Services (General Medical Services Contracts) (Prescription of Drugs Etc) Regulations (Northern Ireland) 2004 make provision as to the drugs, medicines or other substance that may be ordered for patients in the provision of medical services under a general medical services contract within the meaning of Article 57 of the Health and Personal Social Services (Northern Ireland) Order 1972.

   Schedule 1 to the Regulations lists the drugs and substances that are **not** to be prescribed under a general medical services contract. Schedule 2 lists the drugs, medicines and other substances that **may be ordered** under a general medical services contract **only in certain circumstances** and sets out those circumstances.

   Chemist contractors are under no obligation to supply a scheduled drug that may be ordered erroneously on a prescription form by a doctor or dentist, or on a stock order form by a dentist, and can have no claim against the BSO in respect thereof.

List Prices

3. References to the list prices shall be construed as references to net cost prices in the price lists of such manufacturing or wholesale firms as may be selected by the Department after consultation with the Local Pharmaceutical Committee.

Containers (see also Part V)

4. Paragraph 16 of the Terms of Service [Schedule 2 to the Health and Personal Social Services (Pharmaceutical Services) Regulations (Northern Ireland) 1997] requires the chemist to supply all drugs in suitable containers, which include a 5ml spoon where appropriate.

Questions

5. Any questions arising as to the price or dispensing fee to be allowed in a particular case shall be determined by the Department after consultation with the Pharmaceutical Contractor's Committee.

Prices Of Drugs And Preparations Included In Part I And Chemical Reagents Included In Part II

Tariff Prices

6. The tariff prices are generally net cost prices calculated from the agreed wholesale price lists.

Concessionary Prices

6a. In Northern Ireland, the policy is that all concessionary prices which are set by the Department of Health and Social Care are applied in Northern Ireland. A definition of this process is detailed at NHS Electronic Drug Tariff (nhsbsa.nhs.uk).
Since April 2024, this process has included a retrospective top-up payment; this will also apply in Northern Ireland and details of the products and payment schedules are available on the BSO website at Concessionary Prices - Business Services Organisation (BSO) Website (hscni.net)

Payment for Water

7. Payment for water will be made only (a) where purified water has been prescribed, or (b) where its use is implied, e.g., where the Business Services Organisation (hereinafter called "the BSO") after consultation with the Department is satisfied that the water ordinarily available is unsuitable for dispensing purposes and purified water is used.

Revision of Prices

8. The prices of drugs and preparations included in Part I and Chemical Reagents included in Part II will be revised monthly in accordance with current list prices.

Pricing of Other Drugs and Preparations

9. Drugs and preparations not included in Parts I II and IX and not being scheduled drugs will normally be priced on the basis of the most cost-effective price rate derived from list prices for the pack sizes generally available to chemist contractors. Where a chemist contractor's throughput of drugs and preparations does not justify supply from the pack size from which the most cost-effective price rate is derived, the chemist contractor may endorse the prescription with the pack size from which the supply is made. Payment will be based on the list price for the pack size so endorsed but in any doubtful case the BSO will, before pricing, satisfy itself that the pack sizes used were reasonable in relation to the contractor's throughput of drugs and preparations. If the BSO is not satisfied that the pack sizes used were reasonable - or if the prescriptions are incompletely or incorrectly coded by the chemist contractor, the standard price convention set out above will be applied.

Oncost Allowances for Chemist Contractors

10. Oncost allowances payable on gross or net ingredient cost are detailed below. In special circumstances an additional oncost is payable for trusses and elastic hosiery.

i. HS prescriptions for oxygen and oxygen therapy equipment

The oncost allowance payable for these items is 10%.

ii. Stock orders

The oncost allowance payable for items ordered by doctors on a stock order form is 17½% of the net ingredient cost of these items calculated in accordance with paragraph 9.

iii. HS prescriptions for trusses and elastic hosiery

An additional oncost allowance of 15% based on the gross ingredient cost is payable when the measuring and fitting of trusses or elastic hosiery has been carried out by a chemist and the prescription has been endorsed "measured and fitted" or has been coded as such according to the Prescription Code issued by the BSO.

Appliances

11. Part III contains the list of appliances that may be ordered by medical practitioners on the Medical List.

12. Appliances not included in Part III may not be ordered and suppliers of appliances are under no obligation to supply any such appliance and can have no claim against the BSO in that respect thereof.

13. Part III gives the specifications and tariff prices of such appliances. All appliances must conform to the specifications and sizes shown in Part III.

Prices of Appliances

14. Prescriptions for elastic hosiery and trusses supplied by chemist contractors will be reckoned along with those for drugs and will consequently qualify for the appropriate oncost allowance as set out in paragraph 10. Where measuring and fitting have been carried out, an appropriate fitting oncost (15%) will be paid by the BSO, where claimed.
The prices of other appliances given in Part III will be the prices so stated (subject to alteration monthly, in accordance with variations in list prices). Where a price is not shown in the tariff for an appliance the price will be the list price, or in the case of appliances not included in a price list, the invoiced wholesale net cost price. Provided that if in any case the Department approves a special price different from that ascertained as aforesaid, such price shall apply in lieu thereof.

Payment to Appliance Contractors

15. Suppliers of appliances only will receive the cost of the appliance as detailed in paragraph 14 above, 25% oncost allowance and a 15% measuring and fitting fee where appropriate and where claimed. No dispensing fee is payable in respect of the supply of an appliance.

Dispensing Fees For Chemist Contractors

16. In accordance with the terms of Regulation 9(2) of the Pharmaceutical Services Regulations (NI) 1997 (Standards of, and payments for drugs and appliances), and, in relation to dispensing or other fees payable in respect of the supply of drugs and appliances and of the provision of supplemental services and of additional professional services or any other fee, allowance or other remuneration in respect of the provision of pharmaceutical services by chemists, the determining authority is the Department of Health.

17. In addition to the payment of ingredient costs, the oncost allowances (see para 10), and the payment for coding prescriptions (see para 18), dispensing fees will be paid at the rate shown in the table below. These dispensing fees are not payable on stock orders or on prescriptions for oxygen or oxygen equipment.

Fee per Prescription

(1). All medicaments (including proprietaries) not requiring extemporaneous preparation and all liquids for internal and external use prepared by addition of water or by simple dilution for extemporaneous dispensing £1.51

(2). All medicaments requiring extemporaneous dispensing:

a. All liquids for internal and external use prepared to a special formula, e.g.mixtures, lotions, nasal drops £4.53

b. i. Ointments, creams, pastes prepared by dilution or a mixture of standard or proprietary ointments, creams or pastes

Quantity (a) not exceeding 200g £3.79
(b) 201g-500g £7.56
(c) over 500g - per 500g or part thereof £7.56

ii. Ointments, creams, pastes prepared to a special formula

Quantity (a) not exceeding 200g £7.73
(b) 201g-500g £15.49
(c) over 500g - per 500g or part thereof £15.49

c. Special formula bulk powders £7.56

d. Individual powders, capsules, etc.:
(a) first 10 ..... £3.10
(b) per powder, capsule etc. thereafter £0.32

e. Liquids prepared by aseptic technique, e.g. eye drops £13.78

f. Liquids prepared by a BP sterilisation process £15.39

Dispensing Fees For Chemist Contractors cont.

(3). Appliances:

a. All appliances except for ostomy / urinary equipment..... £0.20
b. Ostomy / urinary equipment..... £1.65
c. Wound Management Formulation £1.11

(4). Additional fee for dispensing prescriptions for:
a. Schedule 2 Controlled Drugs..... £1.74
b. Schedule 3 Controlled Drugs..... £0.54

(5). Dispensing fee related to period of treatment
Supplementary fee payable when quantity of preparation prescribed and dispensed exceeds the threshold listed in Part VII for that preparation..... £0.63

(6) Instalment Dispensing Fee £1.40

NB: This supplementary fee may be claimed only for preparations listed in Part VII of the Tariff where the quantity of the preparation prescribed and dispensed exceeds the threshold listed for that preparation.

(7) Everyday Health Conditions Consultation Fee

Consultation fees for the Everyday Health Conditions Scheme are paid under a tiered structure. The payment due within the structure is based on the number of cumulative consultation fees from 1 January 2024.

Payment Due	Lower Limit	Upper Limit
£8.50	1	500
£7.50	501	1000
£6.50	1001	2000
£5.00	2001	2950
£0.00	2951	

For all prescriptions dispensed extemporaneously, ingredient costs will be reimbursed in accordance with the provisions of the Tariff and the relevant dispensing fee at paragraph 2 above will be paid. Where a chemist contractor for some reason cannot dispense the prescription extemporaneously or elects to have it made up as a "special", the chemist contractor must provide to the BSO the reasons why a "special" was necessary. In any doubtful cases the BSO, before pricing, may refer matters to the Pharmaceutical Committee of the BSO to ascertain if the additional costs involved through use of a "special" were necessarily incurred and were reasonable. Only in circumstances where the Pharmaceutical Committee is satisfied that the use of "special" was necessary, will the invoiced "special" price be reimbursed and the dispensing fee at paragraph 1 above be paid. In other cases, payment of ingredient costs and dispensing fees will be made on the basis that the prescription had been dispensed extemporaneously.

Chemist contractors are required to endorse CD prescriptions for drugs included in Schedule 2 and 3 to the Misuse of Drugs (Northern Ireland) Regulations 1986 (as amended) with the letters "CD" unless a Code has been assigned in The Prescription Code issued by the BSO. These prescriptions should be coded as far as possible and included in the appropriate section of the prescription bundle when submitting the forms to the BSO. Provided these requirements are met the additional fee at paragraph 4 above will be paid.

Serious Shortage Protocol

Reimbursement for any product supplied under a Serious Shortage Protocol (SSP) will be as if the product had been dispensed against a prescription. The prescription should be endorsed with the annotation “Supply in line with SSP [Insert number]” to indicate that a supply was made in line with an SSP and also any other usual endorsements as appropriate for the product. Details on necessary endorsements will also be detailed on the BSO website (www.hscbusiness.hscni.net/services/3063.htm). Contractors should submit their prescriptions that have an SSP endorsement at the top of their amended bundle, with the second submission clearly separated from other prescriptions in the amended bundle. The number of prescriptions submitted with a SSP endorsement should be noted at the bottom of the second submission (HS30).

Payment For Coding Prescriptions

18. For the purpose of payment prescriptions should be coded and, where necessary, endorsed as indicated in the Prescription Code issued by the BSO.
An allowance at the rate of 4.43p per prescription (including stock orders and prescriptions for oxygen gas) is payable to chemists for the work of coding prescriptions and payment will be made by the BSO in respect of prescriptions furnished by a chemist to the BSO each month. If however it is found that the standard of accuracy of coding for the month for which the allowance has been paid was not at least 95% and that within the 12 months prior to the month for which the allowance was paid the chemist had on two or more occasions been notified that his standard of accuracy of coding had fallen below 95% recovery of the allowance for that month will be effected by deduction from subsequent payments due by the BSO to the chemist.

Urgent Prescriptions

19. Urgent fees may be paid on prescriptions (including stock orders and those for oxygen and oxygen equipment) for which the chemist is required to re-open his pharmacy outside both contracted hours of service and agreed rota opening hours.

a. prescriptions endorsed "Urgent" by prescriber.

The following fees may be claimed: **Fee per call out**

i. Prescriptions dispensed between the time the premises close for dispensing and 11.00pm on days other than Sundays and Public Holidays £30.00
ii. Prescriptions dispensed between 11.00pm and the time the premises open for dispensing on days other than Sundays and Public Holidays £50.00
iii. Prescriptions dispensed at all eligible hours on Sundays and Public Holidays . £50.00

The prescription forms must be endorsed by the pharmacist with the hour and date of dispensing.

b. Other prescriptions dispensed urgently.

Where the prescription form has NOT been endorsed "Urgent" by the prescriber but where, in order to meet the urgent needs of the patient, the prescription has been dispensed urgently between 11.00pm and 8.30am, or on Sundays and Public Holidays, the urgent fee of £50.00 may be claimed provided that: -

i. a. In the case of prescriptions dispensed between 11.00pm and midnight, the prescription was dispensed on the day it was written; or
b. In the case of prescriptions dispensed between midnight and 8.30am, the prescription was dispensed on the day or on the day following that on which it was written.

ii. The prescription form is endorsed "Dispensed urgently at..... p.m./a.m. on .....(date)" by the pharmacist and is signed by the patient or his representative.

Broken Bulk

20. Payment for broken bulk can be claimed in respect of:

i. Drugs and preparations not listed in Part II; and
ii. Incontinence and Ostomy appliances - Part III

When in relation to i and ii, such drugs and appliances are prescribed in a quantity other than the quantity stated in Part III or when, in relation to i, such drugs and preparations are prescribed in a quantity other than the minimum quantity the manufacturer or wholesaler is prepared to supply and when, in relation to I or ii, the chemist contractor would not expect to be able readily to dispense the remainder, payment may be made additionally for the remainder in each case subject to the discretion of the BSO in any doubtful cases. Broken bulk should be claimed by endorsing the prescription and indicating the date of dispensing. **Subsequent prescriptions for the same drug preparation or appliance dispensed within 6 months will be taken to have been dispensed from the remainder until it has been used and such subsequent prescriptions should not be coded but must be endorsed N/C to indicate that no claim is being made for the ingredients.**

Instalment Dispensing

21a. Instalment dispensing is the supply, by a pharmacist, of part of the total quantity of a prescription-only-medicine, at set intervals (e.g. daily, weekly, twice-weekly) as requested in writing by the GP or other authorised prescriber. Instalment dispensing is an “exception” facility for use where the prescriber considers that it is essential to protect the well-being of the patient (to prevent abuse or misuse of specific drugs as defined in paragraph 21b) that instalments of the drugs prescribed should be supplied to the patient at stated intervals. The prescriber may endorse the prescription to that effect in those circumstances. It must be clearly indicated on the prescription which item(s) require instalment dispensing and which are for normal dispensing. Prescribers should exercise caution with computer-generated and repeat prescriptions.

21b. The drugs which may be prescribed in instalments will normally be categorised as:
Analgesics including opioids
Antidepressants
Antiepileptics including gabapentinoids
Antipsychotics
Barbiturates
Benzodiazepines
CNS depressants
Sedative antihistamines
Skeletal muscle relaxants
Stimulants including drugs to treat ADHD
Triptans
Z drugs

Note: this list may change as new drugs become available or others are discontinued.

The prescriber may, in exceptional circumstances, prescribe other medicines in instalments if essential to protect patient safety.

21c. Where a prescription item is endorsed by the prescriber as requiring instalment dispensing, the pharmacist may dispense doses for the patient to take away when the pharmacy is closed.

21d. Instalment dispensing fees are not payable in respect of patients in care homes or in other settings where staff administer medicines to patients.

Out Of Pocket Expenses

22. Where additional expenses have been incurred in obtaining from a manufacturer or wholesaler supplies of a drug, chemical reagent or appliance (other than those items for which prices are given in Parts I Category A and M, II and III of the Tariff), which the chemist or appliance supplier does not frequently require to provide, or where out of pocket expenses have been incurred in obtaining oxygen specially for supply against a prescription, payment of the amount incurred will be made if the contractor submits a claim giving details to the BSO with the appropriate prescription form and the BSO is satisfied that the additional expenses were necessarily incurred and were reasonable.

Out Of Hours Services

23. Payments for out of hours services is determined by the Department of Health.

Grants Payable To Employers Of Foundation Training Year (FTY) students

24. A grant of £29,954 per annum is payable to chemists who provide foundation year training needed to pharmacy graduates for admission to the Pharmaceutical Society of Northern Ireland's Register of Pharmaceutical Chemists. The grant includes a protected employer allocation of £5,500 per foundation training year placement to cover training and employer on-costs associated with each placement. The remainder of the grant is for the provision of a salary of £24,454 for each foundation year trainee.
Chemists who have provided foundation year training in line with the regulatory requirements of the Pharmaceutical Society of Northern Ireland can claim payment from the BSO on a quarterly, six monthly or annual basis, or in cases where the training period was shortened by unavoidable circumstances at the end of the actual training in which case a pro-rata grant will be calculated and paid.

Drugs Which May Be Ordered By Dental Practitioners, Nurses or Independent Prescribers

25. (i) Dental practitioners on the Dental List may order any of the drugs listed in Part IX (a). Drugs not included in this list may not be ordered by dental practitioners.
(ii) District Nurses and Health Visitor prescribers who have completed the necessary training may only prescribe those drugs and appliances listed in Part IX (b). Drugs and appliances not listed in this list may not be prescribed by nurses.
(iii) Nurse Independent Prescribers and Pharmacist Independent Prescribers are able to prescribe any licensed medicine for any medical condition.
(iv) Optometrist Independent Prescribers can prescribe any licensed medicine for ocular conditions affecting the eye and surrounding tissue, but cannot prescribe any controlled drug independently.
(v) Physiotherapist Independent Prescribers can prescribe any licensed medicine for any condition within their competence within the overarching framework of human movement, performance and function. With effect from 15 November 2019 this includes specified controlled drugs. For details see Part IX (c).
(vi) Podiatrist Independent Prescribers can prescribe any licensed medicine within their competence and relevant to the treatment of disorders affecting the foot, ankle and associated structures. With effect from 15 November 2019 this includes specified controlled drugs. For details see Part IX (c).

Chemists are under no obligation to supply any such drugs or appliances not in these lists and can have no claim against the BSO in that respect thereof.

Expensive Prescription Fee

26. A fee equivalent to 2% of the ingredient cost before discount will be payable on all prescriptions over £100.

Payment For Additional Professional Services

27. Contractors who satisfy certain criteria can apply to the Department of Health for a payment of £2,272.25 in respect of additional professional services. The qualifying criteria are as follows:

i. the pharmacy must have had passed for payment 1300 prescriptions or more in the relevant month;
ii. the pharmacy must have produced a practice leaflet;
iii. the pharmacy must display up to a maximum of 8 health promotion leaflets. Contractors may display additional health promotion material if they wish, but are not required to do so to qualify for payment;
iv. the contractor must, subject to the conditions of paragraph 30, keep patient medication records.

Graduated Transitional Payment

28. Contractors who have passed for payment between 800 and 1299 prescriptions in the relevant month shall receive a graduated transitional payment rising from £1,136.13 a month at 800 prescriptions to £2,269.98 at 1299 prescriptions.

Essential Small Pharmacy Scheme

Criteria

29.1 Those pharmacies that dispense less than 1300 prescriptions per month and are more than 1 kilometre from the next nearest pharmacy, by the route most convenient to the public, will qualify for inclusion in the scheme.

29.2 Contractors will also be required to meet the qualifying conditions for the additional professional services payment, other than, of course, the volume threshold.

Payment

29.3 The rate of payment shall be £1.51 for each prescription by which the number actually dispensed per month falls short of 1300 subject to a maximum of £1,057.00 (700 x £1.51). Payment will be calculated monthly by the BSO.

29.4 Part-time essential small pharmacies will qualify for a proportion of the payment based on their hours of opening. The proportions shall be as follows: -

Pharmacy open	
up to 6 hours per week	60%
between 6 hours and up to 12 hours per week	70%
between 12 hours and up to and including 18 hours per week	80%

Essential Small Pharmacy Scheme cont.

Professional Allowance

29.5 Full rate professional allowance will be payable to full time essential small pharmacies without the need to dispense 1300 prescriptions, provided that the other qualifying conditions are met.

29.6 Part-time essential small pharmacies will receive a proportion of the full professional allowance calculated as above.

Applications

29.7 Contractors shall apply for payment by completing the appropriate application form and forwarding it to the Department of Health.

29.8 The Department of Health, within 4 weeks of receipt of an application, shall in respect of each pharmacy: -

(1) verify the distance from the next pharmacy, the normal hours of service provided, and the number of prescriptions dispensed. To determine qualification the number of prescriptions per month will be based on the number dispensed in the 12 months immediately preceding the application. Thereafter, payment will be based on the number actually dispensed each month;

(2) verify whether the qualifying conditions, other than volume, for receipt of the payment for additional professional services are met;

(3) notify the CPNI by sending a photocopy of side 1 of the application form. Side 2 should under no circumstances be sent, as it is important that the number of prescriptions dispensed by an applicant is not divulged;

(4) decide whether the pharmacy can be included in the scheme;

(5) enter the name of each successful applicant on an essential small pharmacy register;

(6) advise the BSO of each successful applicant and ask them to make appropriate monthly payments;

(7) inform without delay any applicant who has not been successful, setting out the reason why.

Claim forms should be retained for 6 years after the date of decision.

..

Payments

30.7 The rates and frequency of payment will be determined by the Department of Health.

Patient Medication Records Scheme

31.1. These arrangements, which from 1 April 1996 formed one of the criteria for the receipt of the allowance for additional professional services, cover the keeping of records of medicines and advice supplied patients who are on long-term medication, and who are in one of the following two groups:

(a) men and women aged 60 or over;

(b) other patients who, in the opinion of the pharmacist, may have difficulty in understanding the nature and dosage of the medicine or drugs supplied, and the times at which they are to be taken.

31.2 Each record should contain the patient's name, address and date of birth, with information on the medicines supplied i.e. product, dosage, strength, presentation, quantity and date of dispensing; and, if on the prescription, the GP reference.

31.3 Contractors will be responsible for registration under, and compliance with, the Data Protection Act. Contractors are advised to ensure that they list the Department of Health as a body to whom the data they hold may be disclosed.

31.4 Contractors must undertake that the pharmacist(s) they employ or use to provide the service will comply with any necessary education/training requirements, as determined or approved by the Committee for Post Qualification Education and Training.

31.5 Contractor chemists must, within 12 months of being awarded a payment for additional professional services, be able to demonstrate that they satisfy the education and training requirements and are providing patient medication records for a minimum of 50 persons from the groups defined in paragraph 31.1. To remain eligible these criteria must continue to be maintained.

31.6 Records maintained in connection with the residential homes scheme are not reckonable under this scheme.

31.7 From 1 April 1996 payments were subsumed within the allowance for additional professional services.

31.8 Under the terms of the Health and Personal Social Services (Pharmaceutical Services) Regulations (Northern Ireland) 1997 (as amended),the Department of Health have a right of access to the records maintained by the contractor for the purposes of this scheme.

Additional Notes

Rectified Spirit

32. i. Where Alcohol (i.e. 95%) or Rectified Spirit, or any other of the Dilute Alcohols is prescribed alone or as an ingredient in a medicament for external application, it should be replaced by Industrial Methylated Spirit unless the prescriber has indicated to the contrary (e.g. by the use of the letters "NA", meaning "no alternative"). In the absence of such indication, payment will be made for the supply of Industrial Methylated Spirit.

ii. Where Alcohol (i.e. 95%) or Rectified Spirit, or any other of the Dilute Alcohols is prescribed as an ingredient of a medicine for internal use and where the chemist does not claim a rebate from the Customs and Excise, he must endorse the prescription "Rebate not claimed" when the price of the duty paid alcohol will be allowed.

Oxygen Apparatus

33. The rates of payment of professional fees for the provision of oxygen therapy equipment is determined by the Department of Health.

Reward Scheme - Fraudulent Prescription Forms

34. Payments to chemists who claim a payment under regulation 10A(1) of the Health and Personal Social Services (Pharmaceutical Services) Regulations (Northern Ireland) 1997, as amended.

The Scheme allows chemists to claim a financial reward where they have identified a fraudulent prescription form, and thereby prevented fraud. A reward is payable where there is an identified saving for the Health Service and the conditions for one or both types of reward has been met.

The scheme allows the BSO to make reward payments on behalf of the Department of Health on prescription forms submitted with claims

The Basic Reward

Claims made where the chemist has not provided the drugs, medicines, or listed appliances specified on the fraudulent prescription form.

The chemist will be eligible for a payment of 10% of the basic Health Service price of the items ordered on the fraudulent prescription form, or £10, whichever is the greater, where all the conditions for payment are met.

The conditions for payment are:

i. the drugs, medicines, or listed appliances specified on the fraudulent prescription form have **not** been provided, and the Department of Health was immediately informed, in accordance with regulation 10A(1)(a);

ii. a claim is made by returning to the BSO a duly completed claim form, provided by the BSO, within 10 days of the prescription form having been presented;

iii. the form presented as a prescription form was not a genuine order for the person named on the form; an order would not be a genuine order if, for example, it had been stolen or counterfeited and not signed by an authorised prescriber; or had been altered otherwise than by the authorised prescriber by whom it was issued.

The Bonus Reward
Where the chemist has <u>either</u> not provided the drugs, medicines, or listed appliances specified on the fraudulent prescription form presented; <u>or</u> where the chemist has provided the drugs, medicines, or listed appliances specified, but subsequently came to have reason to believe that the prescription was not genuine

The chemist will be eligible for a payment of 5% of savings resulting from the information he provides, or £10,000, whichever is the less, where the conditions for payment are met.
The conditions for payment are:

i. the Department of Health was immediately informed, in accordance with regulation 10(A)(1)(a), or informed within 14 days of the prescription being presented to the chemist, in accordance with regulation 10A(1)(b) as appropriate;

ii. a claim is made by returning to the BSO a duly completed claim form, provided by the BSO, within 24 days of the form having been presented;

Reward Scheme - Fraudulent Prescription Forms cont

iii. the form presented as a prescription form was not a genuine order for the person named on the form; an order would not be a genuine order if, for example, it had been stolen or counterfeited and not signed by an authorised prescriber; or had been altered otherwise than by the authorised prescriber by whom it was issued.

iv. the BSO consider that the information on the claim form has contributed to the detection and prevention of a fraud, or the recovery for the Health Service of sums lost through a fraud, other than the cost of the drugs or listed appliances ordered on the fraudulent prescription form which is the subject of the claim; to satisfy this condition, the BSO must consider that at least one of the following criteria is fulfilled:

- the fraud would not have been detected or stopped without the information provided on the claim
- the fraud would not have been detected until a later date, or would not have been stopped until a later date, without the information provided on the claim
- the information provided on the claim was cited as evidence in criminal or civil proceedings; this is regardless of the outcome of those proceedings, provided that condition (v) below is met

v. the BSO considers that the fraud, about which the claim provided information, has been stopped subsequent to the claim being received.

The BSO will estimate savings resulting from the information provided, by the addition of (a) and (b) as follows:

(a) losses prevented will be calculated by reference to an estimate of whichever is the greater of:

- losses in the 12 months up to the stopping of the fraud, or
- losses in the financial year previous to the stopping of the fraud, or
- an annual rate of loss over an average of up to 5 previous financial years before the stopping of the fraud, if the data are available.

(b) if previous losses to the Health Service are recovered, whether or not by civil proceedings, the total sum recovered.

The level of savings will be agreed with the Policy and Accounting Unit of the Health and Social Services Executive.

If a number of claims, each of which fully meets the conditions for payment, lead to the prevention or detection of one fraud, or the recovery for the Health Service of sums lost through one fraud, a Bonus Reward of 5% of the savings or £20,000, whichever is the smaller, in total may be shared between the claims. The BSO will decide the shares for each claim according to their contributions to the saving for the Health Service, or, if this cannot be reasonably estimated, the shares will be allocated equally to each claim meeting the conditions for payment.

Calculation of Net Ingredient Costs

Zero Discount List

10. The gross ingredient cost of HS prescriptions (other than domiciliary oxygen prescriptions) and stock orders shall be calculated in accordance with the Drug Tariff for each of the premises included on a pharmaceutical list. Where one or more persons are included on a pharmaceutical list for the same premises then the gross ingredient cost of their HS prescriptions and of doctors' stock orders shall be calculated by applying the discount rate as detailed in Part VI of this Tariff to the aggregated gross ingredient cost of each of the 3 groups. The items excluded from the total gross ingredient costs for the purpose of that calculation are:

GROUP ITEMS

Cold Chain Storage (ALL)
Controlled Drugs in schedules 1, 2 and 3 of the Misuse of Drugs Regulations 2001
Cytotoxic or Cytostatic items (ALL)
Immunoglobulins (ALL)

Part II - Appendix

Notes on Blood Glucose Testing

1. Blood glucose testing strips (BGTS) are primarily intended for insulin-dependent diabetics who will normally have received consultant advice on their condition. One pack (50 strips) would normally be sufficient for 2 months. All strips should be kept in their original container and should not be cut or slit. Because of the differences in colour change in colorimetric types, strips are not interchangeable.
Due regard should be given to the manufacturer's instructions and to the recommendation on storage and period of use after first opening.

2. Misleading results, which could be hazardous if acted upon, might arise if users are inadequately trained. It is therefore essential that patients should receive appropriate training before attempting to use BGTS for monitoring their blood glucose. This instruction should be given by health care professionals who are trained in the use of the product. It should be noted that there are small variations in technique between different makes. Some technical factors are given in paragraph 5 below.

3. General practitioners should be aware that defects in colour vision may occur in diabetes and certain BGT strips should not be prescribed for such patients for visual use. (see outline of colour changes described in each entry on the foregoing pages).

4. Reagent Strips are subject to the following limitations:

Fluoride Specimen:	The strips are not to be used with blood specimens preserved with fluoride.
Serum and Plasma:	The strips are not designed for use with serum or plasma.
Haematocrit:	Extremes in haematocrit levels can affect test results:

Due regard should be given to the manufacturer's product specifications.

5. Disposal of Lancets. Patients should be reminded of the need to exercise caution when disposing of used lancets. These should be placed in a tin or other strong container before disposal. **(The needle clipping device listed in Part III is not generally suitable for use with lancets)**.

As with single-use syringes, the arrangements outlined above are not suitable for patients where there is a risk of infection being transmitted. General Practitioners are similarly advised that blood lancets should only be prescribed for patients who are carriers of infectious diseases where suitable arrangements have been made for the disposal of the used articles as contaminated waste. Medical Officers for environmental health can advise on these arrangements.

Part III

List of Appliances

Notes

1. Definition - The appliances that may be supplied against orders on Form HS21 are listed below and must conform to the specifications shown. These specifications include published official standards i.e. BP, BPC or relevant British Standard or the Drug Tariff Technical Specification. It should be emphasised that any appliance must conform to the entry in this part of the Tariff as well as with the official standard or technical specification quoted therein.

2. Sealed Packets - These are those which are "tamper-evident" - sealed with an easily detachable device that prevents removal of the contents without the seal being broken. Additionally in the case of sterile products: once a sealed package has been opened it should not be possible to re-seal it easily. Where an appliance, other than a bandage, required by the Tariff to be supplied in a sealed packet is ordered of a quantity or weight not listed in the Tariff, the quantity ordered should be made up as nearly as possible with the smallest numbers of sealed packets available for the purpose. Where the quantity ordered is less than the smallest quantity/weight, supply the smaller pack. The quantity of material in each packet supplied should be recorded on the prescription form.

3. Weights - All weights specified in the Tariff in respect of appliances are exclusive of wrappings and packing material.

4. Invoice price - This is the price chargeable for the appliance to the contractor by the manufacturer, wholesaler or supplier.

5. Technical specifications. Numbered Drug Tariff technical specifications are listed in Part XII.

6. The list of preparations that may be prescribed by nurses on Form HS 21(N) is shown in Part IX (b).

General Notes

Prescribing

Before the prescription can be dispensed the following details must be given to the prescriber.

1. Quantity – Single or Pair
2. Article including any accessories
3. Compression Class I, II or III

Constructional Specification

The Complete Structural Specification, as well as performance requirements are contained in the Drug Tariff Technical Specification 40.

Specially Made Garments

1. In cases where stock sizes are not suitable for patients owing to irregular limb dimensions, surgical stockings in the prescribed compression class, to be made to the patient's individual measurements should be specified.
2. All such garments are specially shaped during manufacture and may have a knitted-in or open heel and open or knitted in toe.

Sizing

All articles must conform to BS 6612: 1985 with regard to size designation.

Labelling

All articles must state clearly on the packaging that they conform to the Drug Tariff Technical Specification 40. The packaging should also provide clear washing instructions in conformity with handwashing at 40°C as defined in BS 2747 and washing instructions should be durably and clearly marked on each garment. The packaging should clearly define the garments' percentage fibre content.

2. All garments are specially shaped during manufacture and must have a knitted-in or open heel and open toe.

3. Seams and finishes must be designed to form no restrictions and must be flat and soft against the limb.

Manufacturing Guidelines For Made To Measure Garments

1. Class I and Class II hosiery can be made using the following methods:
   a. Manufactured from open mesh elastic net fabric, cut to shape and seamed.
   b. Shaped or fashioned to individual requirements containing knitted, or knitted and inlaid, elastomeric threads.

2. Class III hosiery can be made as follows:
   Shaped or fashioned to individual requirements with knitted, or knitted and inlaid, elastomeric threads.

NB Elastodiene and elastane threads must be covered for knitting yarns. In the case of hosiery made with inlaid elastomeric threads they may remain uncovered.

Hypodermic Equipment

A Single Patient-Use Products

(i)U100 Insulin Syringes with Needle - Sterile, Single-Use or Single Patient-Use.

Shall comply with the requirements of BS 7548:1992
Sterile: intended for single use or single patient-use for the injection of U100 insulin by diabetics in the community.
NB: Intended for use immediately after filling, and not for containing insulin over extended periods of time.
The syringe may have permanently fixed needles, or detachable needles fitted ready for use. Alternatively, syringes with a separate needle may be supplied.
The sterility of the fluid pathway and functional surfaces shall be protected by either end caps or by suitable unit containers, all of which shall be tamper-evident.
Colour coding:- The colour orange is used to distinguish U100 Insulin syringes.
Instruction for disposal: These are given on the multiple (sales) packs and may be given on the unit or multiple unit pack. (A leaflet containing guidance may be supplied at the time of issue.)
NOTE: Each scale graduation represents one unit on the 0.3ml and 0.5ml syringes and two units on the 1.0ml syringe. The graduations on the syringes are clearly numbered at every 5 units on the 0.3ml and 0.5ml syringes and at every 10 units on the 1.0ml syringe. When the size is not specified by the prescriber, the 0.5ml syringe with needle should be supplied. If the patient is known to inject more than 50 units of Insulin per injection the 1.0ml syringe shall be supplied.

Needles 8mm long shall have a range of needle diameters as follows:
0.33mm (29g) and 0.3mm (30g).

Size	Pack of 10
0.3ml syringe and needle	1.69

Bandages

1. The term “bandage” used in a prescription form without qualification is to be interpreted to mean an Open-Wove Bandage, Type 1 BP 5cm x 5m. All bandages supplied are to be of the lengths and widths specified in the Tariff. Where a bandage longer than those specified in the Tariff is ordered, the number of bandages, that will, in total, provide the length nearest to that ordered, should be supplied. Where a bandage in a width other than those specified is ordered, the next wider specified width should be supplied.

2. All bandages to be supplied completely wrapped as received from the manufacturer or wholesaler. Elastic Adhesive Bandages and Plaster of Paris Bandages to be supplied sealed in containers as received from the manufacturer or wholesaler. Except where otherwise stated all bandages possessing elasticity to be not less than 4.5m in length when fully stretched.

Performance

The table below gives approximate sub-bandage pressures at the ankle according to the size of its circumference, including any sub-bandage dressings or padding. These are obtained when applied at the constant extension shown and in accordance with the technique indicated by the manufacturer:

Application Technique Wound spirally with 50% overlap						
	Bandage	Extension 10%	Ankle Circumference			
			Less than 18 cm	18-26cm	27-35cm	36-50cm
Approx. Sub-Bandage Pressure	P.E.C	70%	Not Applicable	38-27mmHg	26-20mmHg	-
		100%	Not Applicable	50-35mmHg	34-27mmHg	26-19mmHg
	V.E.C	50%	Not Applicable	36-25mmHg	24-18mmHg	-
		75%	Not Applicable	50-37mmHg	37-28mmHg	28-19mmHg

Labelling

1. The Drug Tariff title.
2. The label on the package states the nominal lay flat width.

Catheters, Urinary, Urethral

1.Catheter sizes are designated by the Charrière (Ch) gauge system - even numbers only. (The equivalent metric sizes for Charrière gauges 6-30 are 2.0mm-10.0mm, rising in 0.66mm). Where size is not stated by the prescriber, size 14 or 16 should be supplied.

2.If a balloon size is not stated by the prescriber when ordering a Foley catheter, a 10ml balloon catheter should be supplied - a 5ml balloon in the case of a paediatric catheter.

3.Where the brand is not stated by the prescriber, the basic price of each listed catheter supplied must not exceed:

	Basic Price
Nélaton (Male)	0.44
Nélaton (Female)	0.40
Nélaton (Paediatric)	0.40
Foley (Male) long term	3.99
Foley (Female) long term	3.99
Foley (Paediatric) long term	5.55

Where the specification of the Foley Catheter is not specified by the prescriber and not endorsed as short/medium or long term the dispenser will be paid no more than the lowest basic price listed which is currently £2.27.

4.5-units of plastic catheters, for example, represents on average one month's supply for patients practising intermittent catheterisation.

5.The rate of use of single use Nélaton catheters is approximately between 6 and 45 times greater than reusable Nélaton catheters for patients practising intermittant catheterisation.

All products in this category must be dispensed with a supply of wipes and disposal bags.

PAGE INTENTIONALLY BLANK

Part IV

Domiciliary Oxygen Therapy Service

1. Domiciliary Oxygen

Oxygen should be prescribed for patients in the home only after careful evaluation and never on a placebo basis. Oxygen may be supplied in cylinders or where the quantity required justifies it, from a concentrator but in general the appropriate method of supply will depend on the type of therapy, intermittent or long term, to be prescribed.

2. Intermittent Therapy

2.1 The majority of patients will have oxygen prescribed for intermittent use in a variety of respiratory conditions. This type of therapy is used in patients with hypoxemia of short duration, for example, asthma, when the condition is likely to recur over months or years. It may be prescribed for patients with advanced irreversible respiratory disorders to increase mobility and capacity for exercise and ease discomfort, for example in chronic obstructive bronchitis, emphysema, widespread fibrosis and primary or thromboembolic pulmonary hypertension. Such patients will usually be supplied with oxygen in cylinders.

2.2 Arrangements for the prescription and supply of cylinder oxygen to those patients who require intermittent therapy are set out at paragraph A.1 to this part of the Drug Tariff. GPs are asked to co-operate in an effort to make this part of the oxygen service more cost effective. If more than one or 2 are regularly required for a particular period, prescribing in multiples of 3 cylinders would produce savings by reducing the number of journeys. It is accepted that it will not always be possible to prescribe in this way, for example, because of the infrequency of use of oxygen or because of storage problems at the patient's home but whenever possible cylinders should be prescribed in multiples of 3.

3. Long Term Oxygen Therapy (LTOT)

3.1 Long-term oxygen therapy is the provision of oxygen for 15 hours or more a day for a prolonged period and is of benefit to many patients with chronic hypoxemia. For these patients oxygen should, where possible, be provided by a concentrator.

3.2 Since it is important to recognise that long term oxygen therapy is of benefit to a limited number of patients and that the needs of the majority of patients will continue to be met by intermittent therapy from cylinders, clinical guidelines for prescribing long term therapy have been drawn up for the benefit of general practitioners. These guidelines are set out in full below.

4. Guidelines For Prescribing Long-Term Oxygen Therapy (LTOT)

4.1 On present information, patients who are likely to benefit from long-term oxygen therapy will by definition have chronic hypoxemia, but may for the purposes of these regulations be divided into three groups: -

1. Those for whom there is an absolute indication, for which there is scientific evidence of the value of long-term oxygen therapy.

2. Those in whom there are good grounds for assuming the value of oxygen therapy, but for which there is no firm scientific evidence at present.

3. Patients in whom oxygen would have a useful palliative effect.

4.2 GPs who identify patients who might belong to any of these groups will wish to have consultant advice on the need for LTOT.

5 Indicators For The Use Of LTOT

5.1 Absolute indication.

Patients for whom there is clear evidence of the value of LTOT will be those with chronic obstructive airways disease, hypoxemia and oedema. Such patients will have ankle oedema or a history of an acute exacerbation when ankle oedema was observed. It will be necessary for such patients to be seen and assessed by a respiratory physician with access to respiratory function services. Suitable patients would have a forced expiratory volume (FEV_1) of less than 1.5L, a forced vital capacity (FVC) of less than 2L, and arterial oxygen tension less than 7.3kPa (55 mm/mercury) and some elevation of arterial carbon dioxide tension ($PaCO_2$) greater than 6.0kPa or 45mm/mercury. These tests are the minimum requirement and they should be made in a stable phase of the condition when all reversible factors have been adequately treated e.g. infection, reversible airways disease, cardiac disease etc. In order to establish stability, the spirometric measurements and the arterial blood gases should be repeated at an interval of not less than 3 weeks. There should be variation of no more than ± 20% in the spirometric measurements and a variation of no more than ± 5mm/mercury or 0.6kPa in the arterial oxygen tension. If such variations are exceeded then a further 3 weeks interval should elapse before the tests are repeated again.

5.2 Other patients with chronic obstructive airways disease.

The second group will include all patients with chronic obstructive airways disease having the same spirometric characteristics and the same levels of arterial oxygen tension as those described in para 1.3.1, but in whom hypercapnia is not present and oedema has not been witnessed. Many such patients were studied in American trials of long-term domiciliary oxygen therapy and benefit was clearly shown but such patients were excluded from the British studies. However, many of these patients, including refractory asthmatics and sufferers from cystic fibrosis could be expected to benefit from long-term oxygen therapy. On present evidence long-term domiciliary oxygen therapy should not be denied but the same criteria of stability should be applied to ensure that they are established cases of chronic hypoxemia. We hope that further studies on this group of patients can be urgently carried out.

5.3 Palliative use of oxygen.

This group should include patients with other respiratory conditions associated with severe arterial hypoxemia, but without hypercapnia, for which oxygen therapy may have a useful, palliative effect, without necessarily affecting survival. Examples would be severe hypoxemia associated with the terminal stages of fibrosing alveolitis, industrial lung fibrosis, terminal stages of emphysema, and lung infiltrations such as in sarcoidosis, lymphangitis carcinomatosa and certain collagen disorders.

5.4 Other conditions.

There are other conditions in which palliation of chronic respiratory failure might be considered, for example in severe kyphoscoliosis, gross obesity and the end stage of irreversible peripheral neuropathies and muscle disorders. However, these conditions are associated with such serious disturbances of ventilatory drive that the abolition of hypoxemia by providing additional inspired oxygen may be dangerous. There is also preliminary evidence that long-term oxygen therapy may help some children with pulmonary hypertension. For all these patients the initial assessment would have to be even more detailed than that already described for patients with chronic obstructive airways disease.

6. Post Assessment

6.1 If LTOT is to be prescribed and used effectively it must be remembered that the treatment involves a minimum of 15 hours oxygen per day and whenever possible this should be provided by means of a concentrator. The patient must be fully acquainted with the installation, the working of the concentrator and the need to keep to the arduous therapeutic regimen. The initial flow rate of oxygen through standard nasal prongs will be 2L/min, but may need to be modified between 1.5 and 2.5 litres per minute when the arterial blood gases have been checked with the patient breathing oxygen. The aim is to elevate PAO_2, to 60 mmHg (8kPa) or more without excessive hypercapnia.

6.2 Full co-operation by the patient is essential and expert support will be necessary to enable the 15 hours daily treatment period to be achieved. Regular monitoring in the home by appropriately trained nurses or lung function technicians and follow-up in respiratory outpatients by thoracic physicians will be necessary to ensure that the treatment is achieving optimum results.

7. Patients For Whom Long-Term Oxygen Therapy Is Not Useful

7.1 It is important to stress the circumstances under which LTOT is not indicated. Patients with respiratory conditions that merely produce breathlessness without hypoxemia should not be treated. Long-term therapy is not intended for acute conditions such as lobar pneumonia and other chest infections. Patients with lesser degrees of chronic obstructive airways disease (i.e. not conforming to the criteria in para 1.3.1) or reversible obstructive airways disease including those having acute exacerbations are not candidates for this form of oxygen delivery since their hypoxemia is likely to be only of short duration.

8. Smoking And Long-Term Oxygen Therapy

8.1 Patients who continue to smoke are unlikely to gain much benefit from LTOT and every effort must be made to persuade them to discontinue smoking. There is also the additional hazard of fire.

9. Summary

9.1 It is anticipated that the provision of oxygen concentrators for such patients described above who have proven chronic hypoxemia will be an additional service. It is not intended that oxygen concentrator installations will compete with intermittent oxygen therapy at present provided for patients by cylinder supplies. Patients who would benefit from LTOT from concentrators will need to be carefully selected and carefully monitored and will be relatively few in numbers compared with those having intermittent short burst therapy.

A. Domiciliary Oxygen Therapy Service Provided By Chemists To Health Service Patients

1. General Arrangements for the Service

a. The Board's list of contractors who provide oxygen therapy services includes only those chemists who are authorised to hold a number of lightweight single unit oxygen sets (Specifications 01 A and B) and stands and

i. regularly stock oxygen equipment, as specified in the Drug Tariff, and oxygen gas on the premises;

ii. are prepared, when it would not be reasonable to expect that a patient's representative could safely do so or when he is unable to do so, to deliver the oxygen set and cylinders to the patient's home, to collect empty cylinders when they are being replaced, and to collect the set and cylinders when informed that treatment has been discontinued; and

iii. are prepared to erect and explain the operation of the oxygen set and cylinders at a patient's home, particularly when the patient is having oxygen therapy for the first time.

b. At any time a chemist willing to provide this service may apply to the Board for inclusion on the list.

c. A copy of the Board's list of oxygen contractors, with details of the services being provided, is supplied to every chemist and doctor.

d. If a prescription for an oxygen set or cylinders is presented to a chemist whose name is not included in the list, he should normally provide the patient or his representative with the name, address and telephone number of at least 2 chemists who provide oxygen therapy services at the time the need arises and who are nearest to the patient's home.

e. Except where, in emergency, a set has been loaned by a distant contractor, oxygen gas should normally be supplied to a patient only by the chemist who has loaned the set. When, exceptionally, cylinder replacements are provided by a chemist other than the one who supplied the set, he should at the time when cylinders are supplied satisfy himself that the patient continues to operate the equipment satisfactorily.

f. Delivery and collection of sets and/or cylinders is to be undertaken by a patient's representative where he is willing and where the chemist can fully satisfy himself that the representative is able to transport a set and/or a cylinder, carry it and secure it in position in the house and fit the mask after the instructions provided in the set have been explained to him. In other circumstances delivery, erection and collection of sets and/or cylinders and the explanation of the operation of oxygen equipment at the patient's home, particularly at the commencement of treatment, is to be undertaken by the contractor.

g. The recovery of empty cylinders from patients, and their prompt return to the suppliers for refilling, is essential if adequate supplies of oxygen for the use of patients are to be maintained.

h. As part of the explanatory information under (f), **the chemist must provide appropriate advice on procedures** to be followed to ensure safe use of oxygen equipment in the home. In particular any **safety instructions** issued by the manufacturers of the equipment **must be brought to the attention of the patient or his representative.** In addition chemists will wish to advise the patient or his representative that the Fire Prevention Officer from the local Fire Brigade is prepared to visit the patient's home to provide practical advice which will help ensure safe use of the oxygen therapy equipment.

2. Oxygen Equipment, which may be supplied on loan by chemists to patients

a. Oxygen Sets

The following sets***** (see Specification 01A and 01B) are approved for use within the oxygen therapy service, and any one may be loaned against a prescription for a set:

i. BOC Set (BOC 330228) Specification 01A
ii. Ohmeda Domiciliary Set (MDS 240) Specification 01B
iii. Oxylitre Set (MR 210) Specification 01A
iv. Air Apparatus and Valve set (D24) Specification 01B
v. Ohmeda Domic 2/4 Set Bearing 'S' Stamp (9155033) Specification 01A
vi. BOC Domiflow Set (888830) Specification 01A
vii. Puritan Bennett Set (778435) Specification 01A

***** Spare O-rings may be supplied by the manufacturer with the set, but these should be removed by the contractor before the set is supplied to the patient.

On no account should chemists attempt to modify any oxygen set to produce a higher flow rate than that for which it has been designed. To do so could create a hazardous situation for the patient.

b. Oxygen Administration Equipment

The following masks are approved for use within the oxygen therapy service:-

i.	Constant performance masks:-	See descriptions
	a. Ventimask MK IV, 28%	and illustrations
	b. Intersurgical 010 Mask 28%	
ii.	Variable performance masks	See descriptions
	a. Intersurgical 005 Mask	and illustrations

Constant performance masks provide a nearly constant concentration of 28% oxygen in air over a wide range of oxygen supply, and irrespective of breathing pattern. When a constant performance mask is supplied to a patient, the recommended flow rate is 2 litres per minute (the Medium setting on the control head).

Variable performance masks provide a variable concentration of oxygen in air. The concentration varies with the rate of flow of oxygen supplied and the breathing pattern of the patient.

Two Ventimask MK IV, 28% constant performance masks will be supplied by the manufacturer with each oxygen set. (On account of bulk, these masks require to be packed separately from the remainder of the set).

Where a prescriber considers that the Ventimask MK IV 28% mask is not appropriate for the treatment of a patient, he must state on the prescription which alternative approved mask is to be supplied.

Every mask is supplied for the use of one patient only. All masks, therefore, are "disposable" but each is sufficiently robust to withstand usage even over a long period of treatment.

c. **Connection plastic tubing** (see Specification 01A and 01B). A new length of connection plastic tubing (approx. 150 cm) is to be supplied for each new patient. During extended loan periods, replacement lengths of tubing may also need to be supplied.

d. **Oxygen**

Oxygen should only be prescribed in 1360 litre cylinders.

The lightweight aluminium cylinder supplied by BOC is free-standing and obviates the need for a cylinder stand to be supplied to the patient.

3. **Procedure to be followed in loaning equipment, confirming continued use, and termination of BSO's liability.**

a. The chemist shall on making the loan include a note with the set, saying "This equipment is the property of the chemist, and must be returned immediately to the chemist in good condition when it is no longer required. Any loss of or damage to the equipment is the responsibility of the patient".

b. The chemist shall endorse the prescription with

i. name of set supplied;

ii. the date of commencement of loan; and

iii. size and number of cylinders supplied.

c. i. Where the return shows that the set has been on loan for at least 3 months and has not been returned to the chemist, the Board shall ascertain from the doctor whether the equipment is still required; 2 similar enquiries shall be made if necessary during the first year of the loan.

ii. In cases where the equipment has been on loan to a patient for 18 months or more the Board should make special enquiries as to the circumstances of the loan.

iii. Where the Board is satisfied, after making enquiries that the equipment is no longer required by the patient it shall notify the chemist to arrange recovery.

d. Where the patient fails to return the equipment the onus of collecting it rests on the chemist.

4. **Method of claiming compensation for financial loss in respect of Oxygen Equipment**

Where the chemist suffers financial loss as a result of the act or default of a person causing the loss of, or damage to, oxygen equipment loaned, and the chemist forthwith informs the Board of such financial loss and of the action taken by him, short of actual litigation, to recover the equipment and compensation for its loss or damage from the person concerned, the Board shall investigate the matter and if in their opinion the financial loss was not occasioned by the act or default of the chemist or by his failure to take the appropriate action to recover the equipment and compensation, the Board shall make a payment to him based on the value of the equipment at the date of loss, or equivalent to the cost of repairing the said damage, as the case may be:

Provided that where the contractor is dissatisfied with the decision of the Board he may refer the matter to the Department who shall give such direction to the BSO as it thinks fit.

In this paragraph, the expression "person" means the person supplied, the patient concerned, members of his household, or the authorities of an institution to which the equipment is delivered, as the case may be.

B. Additional Specifications And Descriptions

Lightweight Single Unit Sets

Specification 01A (see also diagram)
The SET comprises:-

i. a. a valve which reduces the gas cylinder pressure from 13,650 k.P.a. to a pressure of 70 to 415 k.P.a;

b. a miniature cylinder contents (pressure) gauge calibrated with ¼, ½ and full markings;

c. a cap consisting of a 2 flow selector which can be turned from the ratchet position marked "OFF" to ratchet positions marked "MED" and "HIGH", these being designed to correspond to flow rates of 2 litres and 4 litres respectively per minute;

d. an outlet, being the male portion of a bayonet type connection;

e. a standard bull-nose cylinder adaptor designed for finger tightening and preferably incorporating an O-ring washer;

f. a safety device, such as a sintered filter, to prevent the spontaneous combustion of particulate material in the control head or in the neck of the cylinder.

ii. **Connection Plastic Tubing:** 150 cm (approx.) plastic tubing, 5 mm bore, 8 mm externally (Ref. Portex 800/012/300) with at one end a bayonet fitting to the control head.

iii. **A Key Spanner** of 100 mm to 150 mm length, for opening the oxygen cylinder valve.

The set parts i-iii are packed in a strong box with full operating instructions being given in the lid.

Two Ventimask MK IV, 28% constant performance masks, each in a closed plastic bag, will be supplied by the manufacturer with each oxygen set. (On account of bulk, these masks will require to be packed separately from the remainder of the set).

NOTE: Spare O-rings may be supplied by the manufacturer with the set, but these should be removed by the contractor before the set is supplied to the patient.

Specification 01B (Lightweight (Single Unit) Oxygen Set) (see also diagram)

The SET will comply with all the requirements of Specification 01A with the exception of Clause i.c. where the following Clause will apply:-

"The head comprises: a control knob which permits the flow of gas to be turned on and off. It will be suitably labelled to indicate the ON and OFF position and the direction of rotation to turn ON ... A ratchet selection device to enable the gas flow to be set at predetermined positions to give flow rates of 2 litres and 4 litres per minute respectively. The positions will be clearly indicated and labelled 2 L (MED) and 4 L (HIGH)."

Lightweight sets which comply with the above requirements may be loaned against an order for a set.

Specification 01C

Throw Away Tubing Assemblies

1. **Tubing Specification**

   Clear PVC Tubing

   Tubing length 50 cms
   Tubing Bore 5 cms

   Suitable for connection to BOC (MDS 240) Oxygen Therapy Equipment.

2. **Connector Specification**

   Metal tubing connector with knurled bayonet coupler for connection to BOC (MDS 240) Oxygen Therapy Equipment.

3. **Tubing and Connector Assembly Specification**

   1 x 150 cm length 5 mm Bore Clear PVC Tubing (Plain Ends). 1 Metal Tubing Connector with knurled bayonet coupler. Complete assembly packed in clear polythene protective wrapping.

Specification 02

Oxygen Masks and Nasal Cannulae.

a. **Ventimask MK IV 28%** (see figure 2)

The mask consists of a one piece transparent flexible moulded face piece incorporating a lightweight rigid clear plastic venturi device that ensures near constant concentration.

It is fitted with an adjustable elastic head-band, and has a soft metal reinforcing strip to ensure a good fit over the bridge of the nose.

Weight (less supply tube) 66 grams

b. **Intersurgical 005 Mask** (see figure)

A flow rate of 2 litres per minute is recommended, no claim being made for the resulting oxygen concentration.

The Intersurgical 005 Mask comprises a soft moulded plastic facepiece, adjustable elastic headstrap and a metal nose clip to ensure a close fit across the nose. A swivel connector on the front of the mask, to which the oxygen tube is connected, can be rotated to suit varying positions of the connecting tube.

Weight (less supply tube) 40 grams

c. **Intersurgical 010 Mask, 28%** (see figure 1)

The mask comprises a soft moulded plastic facepiece, an adjustable elastic headstrap and a metal nose clip to ensure a close fit across the nose. A lightweight white venturi diluter fitted to the front of the mask ensures a near constant oxygen concentration. This can be rotated to suit varying positions of the connecting tube.

Weight (less supply tube) 44 grams

d. **Oxygen Nasal Cannula. Intersurgical 1161**

The oxygen nasal cannula consists of two soft PVC prongs about 10mm long, which project into the nostrils. The nasal prongs when positioned into the nostrils are fed through two PVC tubes of 3mm bore which are placed over the ears and tightened under the chin, by means of a toggle. The two 3mm tubes are joined to an oxygen supply tube of 5mm bore and length 2 metres.

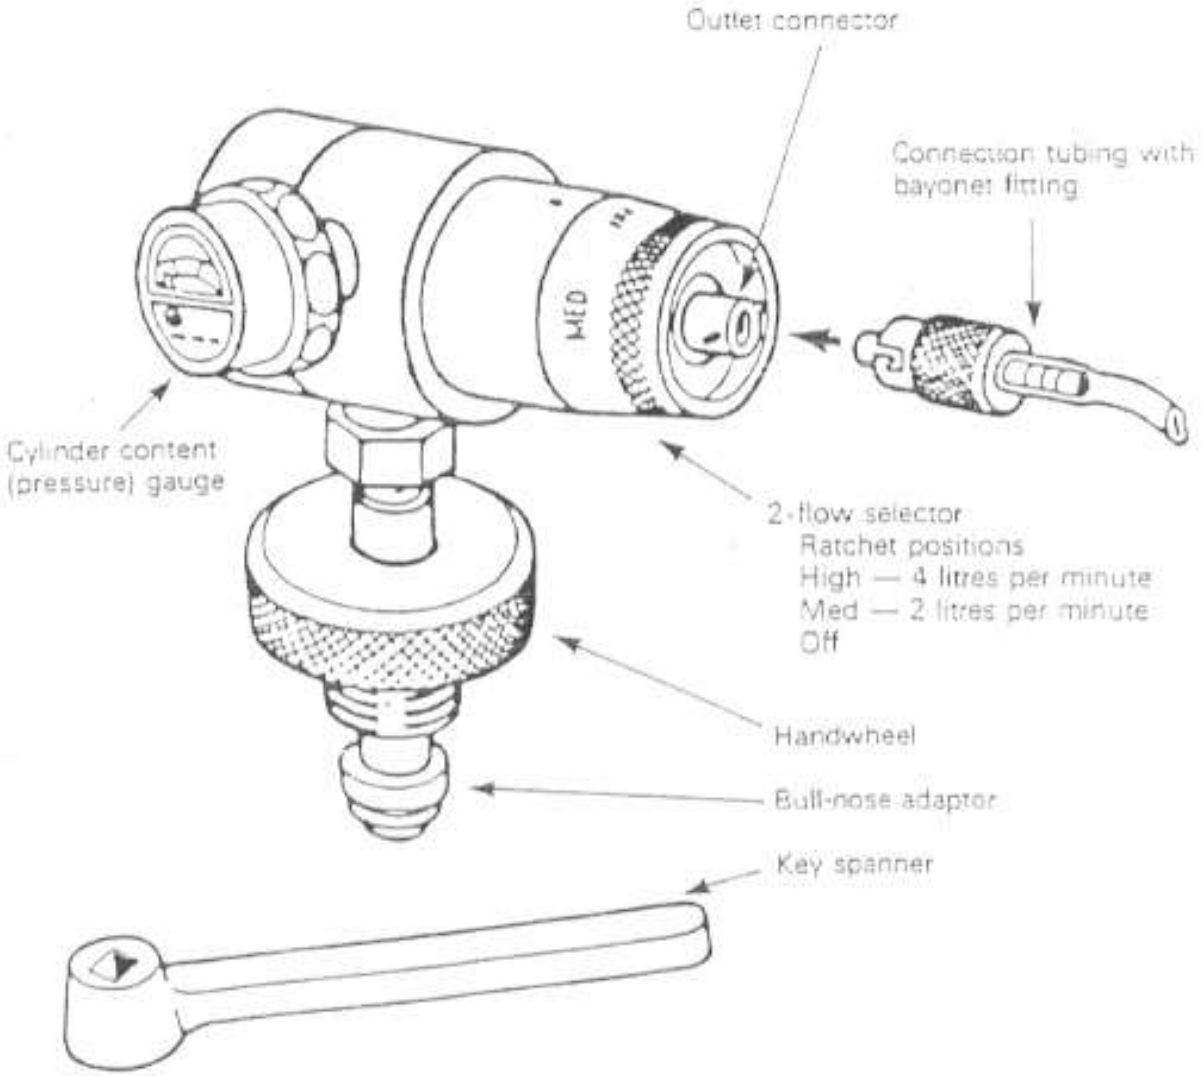

e. **Venticaire Mask** (see figure 4)

This mask comprises a soft moulded clear plastic face-piece, with either an adjustable elastic headstrap, or earloops. A swivel connector is provided on the front of the mask, this rotates to suit varying positions of the oxygen supply tube (not included).

Weight 39 grams

Lightweight Single Unit Set 01A

Emergency back-up supply (comprising regulator, tubing, administration mask and cylinder of oxygen BP)

2. Claims For Payment

The contractor shall despatch prescription forms together with the appropriate claim forms to the Board not later than the seventh day of the month following that in which the supply was made.

3. Concentrator Supplier

Following a competitive tender exercise carried out by the BSO the supplier of oxygen concentrator services from 1 January 2013 will be:

BOC Ltd
Prince Regent Road
Castlereagh
Belfast
BT5 6RW

Phone : 0800 136 603
Fax: 0800 1699 989

4. Oxygen Concentrator Service

An oxygen concentrator is an electrically powered machine, which separates a high proportion of nitrogen and some other components from ambient air and thus delivers oxygen-enriched gases to patients. Oxygen concentrator services will comprise the supply, installation, maintenance, and removal when no longer required, of a concentrator and associated equipment in a patient's home on the prescription of a general practitioner. The service also includes the provision of full instructions to the patient.

5. Concentrators are generally reliable and the risk of breakdown is low, but in the event of a breakdown suppliers will be responsible for responding to an emergency call-out within 10 hours. However, where a doctor considers a patient to be at risk in the event of a concentrator failure, he may prescribe an emergency back-up supply of cylinder oxygen BP that the patient could use until the concentrator is repaired. When it is considered to be necessary, such back-up equipment should normally be prescribed along with the concentrator but the general practitioner should review the need for back-up oxygen regularly and the supply should be withdrawn if no longer required. The emergency back-up supply will form part of the services to be provided by the concentrator supplier. The supplier will also be responsible for the payment of patients' electricity costs associated with concentrator usage.

6. It is accepted that some doctors and most patients will have little knowledge of concentrators and how they are installed. It will, however, be important for a general practitioner to be able to reassure his patient about the advantages of a concentrator before the supplier's initial visit to install the equipment. To assist in this the supplier will be required to provide the Board with copies of a leaflet giving general information on the equipment and services to be provided. The Board should arrange for all general practitioners on the medical list to have a copy of this leaflet in advance of the commencement of the new service. On installation the supplier will provide the patient with a comprehensive booklet.

7. Liaison

Each Board already has an Authorised Officer who is the duly authorised representative for all purposes connected with the contract and will be the point of contact for all enquiries about the concentrator service. The Authorised Officer will liaise with the contractor providing concentrator services and with general practitioners.

8. Prescribing Arrangements For Oxygen Concentrators

Concentrators will normally be prescribed when a patient requires long term oxygen therapy (i.e. 15 hours or more a day over a prolonged period). However it will still be cost effective to prescribe a concentrator for patients who require or are using the equivalent of 21 cylinders or more per month (i.e. 8 hours per day). In no circumstances should a concentrator be prescribed for patients requiring less than 8 hours oxygen per day. When a general practitioner decides that a patient should receive long term oxygen therapy he should take the following action to obtain a concentrator for his patient.

a. Using form HS21, prescribe a concentrator and any other related equipment (e.g. humidifier) specifying on the form the amount of oxygen required (i.e. hours per day) and the flow rate. If a back-up oxygen set and cylinder are required (see paragraph (g) below) these should be ordered at the same time.

b. The GP should give the prescription form to the patient along with an explanation of what a concentrator is and advise the patient that the supplier will be in touch shortly to arrange installation. The patient should also be instructed to give the prescription form to the supplier when he visits the patient's home.

c. The GP should then advise the concentrator supplier by telephone that he has prescribed a concentrator for the patient and ask the supplier to arrange for its installation. The supplier will acknowledge receipt of the order by sending written confirmation to the GP, the patient and the Board.

d. If at any time during the patient's treatment the GP wishes to order additional equipment e.g.. emergency back-up set and cylinder if not previously ordered, he should follow the procedure at (a) to (c) above.

e. If for any reason the GP wishes to alter the regimen he should inform the patient, complete the card which has been given to the patient by the concentrator supplier (entering the date, recommended flow rate, hours of use and his initials) and tell the patient to show it to the supplier when he next visits his home to service the machine.

f. If the patient intends to move to a new address the GP should issue a new prescription for an oxygen concentrator to be provided at the new address or liaise with the patient's new GP if the patient is also changing doctor, so that he/she may issue a prescription.

g. It is essential that the GP notifies the Board immediately the concentrator is no longer required by a particular patient.

h. In the event of a breakdown of a concentrator, the supplier must respond to an emergency call-out by the patient within 10 hours. The Department is advised that patients who are suitable for long term oxygen therapy are generally not clinically at risk if their oxygen supply is interrupted for a few hours but for those patients considered to be at risk GPs may wish to prescribe emergency back-up cylinder oxygen in case of such a breakdown. It is expected that prescribing of emergency back-up oxygen will be limited to only a small number of patients.

9. Under-Use Of A Concentrator

Once a patient has had a concentrator installed in his home it will be important to monitor the volume of oxygen consumption. If the patient's oxygen consumption falls below the level prescribed it may not be cost-effective for him to continue to have a concentrator. Under the terms of the contract, the supplier is required to submit to the Board a statement accompanying claims for reimbursement of patients' electricity costs, setting out in respect of each patient a comparison between the patient's average daily usage of the concentrator over the period of the claim and the daily usage as prescribed by the general practitioner. In those cases where it appears that there may have been a significant under-use of the concentrator the Board should bring the matter to the attention of it’s Medical Adviser for General Practice/GP Adviser so that he/she may discuss the matter with the prescriber.

In those cases where the average daily usage has fallen below the specified level at which a concentrator should be prescribed (see para 8) prescribers should be asked specifically to confirm that the patient has been counselled and that usage of the concentrator will increase. Where no such confirmation is obtained Boards should arrange for the concentrator to be withdrawn and for the doctor to prescribe cylinder oxygen for the patient. Similar action should be taken if, after receiving a prescriber's confirmation of a continuing need for a concentrator at the first enquiry, a further statement from the supplier indicates that usage is still below the specified level.

10. Transfer Of Existing Patients From Cylinders To Concentrators

Some patients who had had cylinder oxygen prescribed for their treatment may reach a point where their oxygen requirements are such that supply would be more economical by concentrator. The Board will identify such patients using the specified level at paragraph 8 and will contact the patient's general practitioner to consider whether the prescription of a concentrator would be a more appropriate form of providing oxygen therapy. If so, the GP should follow the procedure at paragraph 8 (a-h). In such cases a close liaison between the doctor, the concentrator supplier and the patient's existing cylinder supplier will be necessary to ensure that the patient receives sufficient cylinder oxygen to meet his needs until but only until the concentrator is installed.

The Board should ensure that oxygen cylinder contractors are aware of concentrator installations and that they withdraw their equipment and any cylinders (empty or full) from the patient's home as soon as possible after the concentrator has been installed.

11. Withdrawal Of A Concentrator And/Or Associated Equipment

Where a GP advises the Board that a concentrator and/or emergency supply of cylinder oxygen is no longer required for a particular patient the Board should immediately arrange with the supplier for removal of the equipment from the patient's home. At the same time the Board should note their records with the details and date of removal notification.

Part V

Containers

A Pharmacy Contractor shall supply in a suitable container any drug that he is required to supply under Part 2 of the Second Schedule to the Regulations.

Capsules, tablets, pills, pulvules etc. shall be supplied in airtight containers of glass, aluminium or rigid plastics; card containers may be used only for foil/strip packed tablets etc. For ointments, creams, pastes, card containers shall not be used.

Eye, ear and nasal drops shall be supplied in dropper bottles, or with a separate dropper where appropriate.

Provision for supply of either a 5ml plastic measuring spoon (which shall comply with BS 3221:Part 6:1987), or a 1ml, 5ml or 10ml plastic oral syringe measure with every oral liquid medicine, except where the manufacturer's pack includes one. Plastic oral syringe measures must be clearly labelled 'oral' and/or 'enteral' in a large font size, comply with appropriate British or European Standards (BS 3221:Part 7:1995 or an equivalent European Standard for the 5ml syringe) and be wrapped together with a bottle adaptor and instructions. Choice of whether a spoon or syringe (and its size) is supplied will depend on the nature of the medication regime.

In very exceptional circumstances, or where specifically requested by the prescriber dilution may still take place. The prescription should be endorsed accordingly.

Net Ingredient Cost Scale For Chemist Contractors

From January 2024 prescriptions, the discount deduction applied to pharmacy contractors monthly total of reimbursement prices will be transitioning to new arrangements.

Under the new arrangements, which will be fully in place by April 2025, there will be three product groups each with their own fixed deduction rates which will be applied to monthly reimbursement prices of the products in that group, as set out in the table 1 below:

Table 1: Discount deduction rates

Group	Definition and products covered by the definition	Discount Deduction rate
Discount rate 1: Generics	**Products listed in Part I, Category A and M of the Drug Tariff** (excludes products granted price concessions for the given dispensing month)	18.48%
Discount rate 2: Appliances	**Products listed in Part II or Part III of the Drug Tariff** This includes: • Appliances listed in Part III e.g. dressings, elastic hosiery • Incontinence Appliances listed in Part III • Chemical Reagents listed in Part II The Appliances deduction rates applies whether the appliance is prescribed by brand name or generic name.	0%
Discount rate 3: Brands	**Products not covered by Appliances and Generics definition above. This includes:** • Products listed in Part I, **Category C** of the Drug Tariff • Products prescribed by brand name, including **branded generics** • Products **NOT** listed in Part I of the Drug Tariff i.e. non-Part I	5.27%

To note, those products which are listed on the “Zero Discount” list, Drug Tariff - Business Services Organisation (BSO) Website, are exempt from the revised discounting arrangements, as they are from the current arrangements

PART IX (c)

Non-Medical Independent Prescribing (Nurse, Pharmacist, Optometrist, Physiotherapist & Chiropodist/Podiatrist)

Nurse Independent Prescribers and Pharmacist Independent Prescribers are able to prescribe any medicine for any medical condition within their competence. This includes any controlled drug listed in Schedule 2-5, except diamorphine, cocaine and dipipanone as regards persons addicted to certain controlled drugs otherwise than for the purpose of treating organic disease or injury by such persons (Nurse and Pharmacist Independent Prescribers are able to prescribe other controlled drugs for the treatment of addiction).

Nurse Independent Prescribers may mix a controlled drug with another medicine and may supply and/or administer morphine under a Patient Group Direction for the immediate and necessary treatment of sick or injured persons.

Optometrist Independent Prescribers can prescribe any licensed medicine for ocular conditions affecting the eye and surrounding tissue, but cannot prescribe any controlled drug independently.

Physiotherapist Independent Prescribers can prescribe any licensed medicine for any condition within their competence within the overarching framework of human movement, performance and function. With effect from 15 November 2019, this includes the following controlled drugs, provided the drug is administered by the specified method: Diazepam (oral), Dihydrocodeine (oral), Fentanyl (transdermal), Lorazepam (oral), Morphine (oral or by injection), Oxycodone (oral), and Temazepam (oral).

Podiatrist Independent Prescribers can prescribe any licensed medicine within their competence and relevant to the treatment of disorders affecting the foot, ankle and associated structures. With effect from 15 November 2019, this includes the following controlled drugs, provided the drug is administered by the specified method: Diazepam (oral), Dihydrocodeine (oral), Lorazepam (oral), and Temazepam (oral).

Nurse, Pharmacist Optometrist, Physiotherapist & Chiropodist/Podiatrist Independent Prescribers:

- must work within their own level of professional competence and expertise;
- are recommended to prescribe generically, except where this would not be clinically appropriate or where there is no approved generic name;
- can prescribe licensed medicines independently for uses outside their licensed indications (so-called 'off-licence' or 'off-label'). They must accept clinical/legal responsibility for that prescribing, and should only prescribe off-licence/off-label where it is accepted clinical practice. In general, the General Optical Council discourages optometrists from prescribing ‘off-license’ or ‘off-label’. Further guidance is provided in the College of Optometrists Clinical Management Guidelines;
- may prescribe any appliances/dressings that are listed in Part II & III of the Drug Tariff. Optometrist, Physiotherapist and Chiropodist/Podiatrist Independent Prescribers can only prescribe appliances/dressings for the treatment of conditions relevant to their respective areas of professional practice;
- Must <u>not</u> prescribe drugs and other substances listed in Part XI (a) of the Drug Tariff at Health Service expense:
- May prescribe drugs listed in Part XI (b) of the Drug Tariff at Health Service expense, but only in the specified circumstances, for the specified patient groups listed in the Drug Tariff and where this is within their scope of professional practice;

- Nurse and Pharmacist Independent Prescribers can prescribe unlicensed medicines for their patients, on the same basis as doctors and supplementary prescribers. Optometrist, Physiotherapist and Chiropodist/Podiatrist Independent Prescribers cannot prescribe unlicensed medicines:

- Nurse Independent Prescribers and Pharmacist Independent Prescribers may mix medicines for the needs of a particular patient and to direct others to mix. Nurse Independent Prescribers and Pharmacist Independent Prescribers may provide written directions for others to do so for the purpose of administering them to meet the needs of a particular patient.

- May prescribe borderline substances, which have been approved by the Advisory Committee on Borderline Substances (ACBS). A list of ACBS approved products and the circumstances under which they can be prescribed, can be found in Part X of the Drug Tariff. Although this is a non-mandatory list, Nurse Independent Prescribers should normally restrict their prescribing of Borderline Substances to items on the ACBS approved list. Optometrist, Physiotherapist and Chiropodist/Podiatrist Independent Prescribers should not need to prescribe any items on the ACBS list.

Part X

Borderline Substances

In certain conditions some foods and toilet preparations have characteristics of drugs and the Advisory Committee on Borderline Substances advises as to the circumstances in which such substances may be regarded as drugs.The Advisory Committee's recommendations are listed below. Prescriptons issued in accordance with the Committee's advice and endorsed "ACBS" will normally not be investigated.

Manufacturers wishing to notify changes to their products should contact the ACBS by post: Philip Grieve, Secretariat to the Advisory Committee on Borderline Substances, NHS Commercial Medicines Unit, Castle View House, East Lane, Runcorn, WA7 2AA.

List A

This is an alphabetical index of products which the ACBS has recommended for the management of the conditions shown under each product.

General Practitioners are reminded that the Advisory Committee on Borderline Substances recommends products on the basis that they may be regarded as drugs for the treatment of specified conditions. Doctors should satisfy themselves that the products can be safely prescribed, that patients are adequately monitored and that, where necessary, expert hospital supervision is available.Prescriptions for products recommended by the Committee should be endorsed "ACBS".

Note: The Committee has recommended a number of products as complete feeds for certain conditions.They may be prescribed both as sole sources of nutrition and as necessary nutritional supplements prescribable on medical grounds.

Definitions

1. The Committee has defined proven lactose or sucrose intolerance as "A condition of intolerance to an intake of the relevant disaccharide confirmed by:

(i) demonstrated clinical benefit of the effectiveness of the disaccharide free diet; and

(ii) the presence of reducing substances and/or excessive acid (1.00pH) in the stools, a low concentration of the correspondent disaccharidase enzyme on intestinal biopsy, or by breath tests or lactose tolerance tests."

2. The Committee has defined proven whole protein sensitivity as "Intolerance to whole protein, proven by at least two withdrawal and challenge tests, as suggested by an accurate dietary history."

3. The Committee has defined dysphagia as that associated with "Intrinsic disease of the oesophagus, eg. oesophagitis; neuromuscular disorders, eg. multiple sclerosis and motor neurone disease; major surgery and/or radiotherapy for cancer of the upper digestive tract; protracted severe inflammatory disease of the upper disgestive tract, eg. Stevens-Johnson Syndrome and epidermolysis bullosa."
